**Re: Crane Plastics Siding – North Facility / Franklin County
Industrial Storm Water Permit 4GR00349*DG**

Dear Mr. Green:

This letter is written in regard to the storm water inspection that I conducted at Crane Plastics Siding – North Facility, aka Exterior Portfolio, located at 1550 Universal Road, Columbus, Ohio. The inspection was conducted on February 7, 2011, to determine compliance with your industrial storm water permit. I was escorted around your facility by Jeff Byczynski and Tom Daniels. Your facility manufactures plastic siding. The following items were noted during the inspection:

1. There was a dumpster near the main loading/unloading area which had a lot of debris accumulated around and under the dumpster. The debris was discharging to a nearby storm water drain. Please provide better housekeeping at dumpsters. Please see attached pictures.
2. The facility needs to have spill kit containers located near the loading/unloading areas. Please post emergency contact names and numbers near spill kits.
3. Please send me an electronic copy of your storm water pollution prevention plan (SWP3) and a spill prevention control and countermeasure plan. The plans should be updated annually or when there is a change in management.
4. There was an uncovered dumpster that appeared to contain old parts. Please cover this dumpster. Please see attached picture.
5. There was an old greasy piece of equipment stored outside by a dumpster. Old parts should be stored under roof in containment or inside the building.
6. There was a loading/unloading area which contained hoses in the rear of the building. It appeared that spillage was discharging off-site to a ditch along the eastside of your property. This area needs to have containment, possibly along the entire ditch. A spill kit should be located in this area. Please see attached pictures.
7. Please be aware that your industrial storm water permit expires in August of 2011. Please submit a renewal application no later than 60 days prior to the permit expiration date.
