**Re: Clean Water Ltd. / Franklin County
Industrial Storm Water Permit 4GR00456*DG**

Dear Mr. Malatesta:

This letter is written in regard to the storm water inspection that I conducted at Clean Water Ltd., located at 2480 Jackson Pike, Columbus, Ohio. The inspection was conducted on December 21, 2010, to determine compliance with your industrial storm water permit. Your facility treats various wastewater streams and recycles oil. The following items were noted during the inspection:

1. There were empty totes and drums stored outside without lids. Please have lids on totes and drums stored outside. Please see attached picture.
2. Totes and drums that contain product that are stored outside need to be stored in secondary containment and preferably under roof. Please see attached picture.
3. There was an oily sheen in storm water in several areas throughout the site. The facility should have a spill kit container located by the tote and drum storage area. Please have employees use absorbent material on spills as needed. Please also post emergency contact names and numbers in the storage area. Please see attached picture.
4. If you have not already done so, a storm water pollution prevention plan (SWP3) and a spill prevention plan need to be developed for this facility. Please send me an electronic copy of the plans to greg.sanders@epa.state.oh.us. Please update these plans.
5. There was a bucket without lid containing an oily substance stored next to a piece of oily machinery. Please store wastes in marked containers with lids. Also, please store oily machinery under roof.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
