Re: **Construction Storm Water Inspection at Asherton Grove
Permit Number 4GC02356*AG**

Dear Mr. Fulkert:

This letter is written in follow-up to a construction storm water inspection I conducted Asherton Grove in Franklin County on December 1, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. The following was noted:

Sediment and Erosion Control:

- Two large impoundments were noted adjacent to the entrance of the site. It appears these impoundments were utilized for sediment control. However, I did not observe a sediment control outlet structure. Please ensure an outlet structure is installed addressing the sediment control volumes mandated in the General Permit.
- Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days. ***Given the time of year a crimped mulched cover or equivalent is expected for all barren areas in preparation for the remaining winter months***

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at: harry.kallipolitis@epa.state.oh.us.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
