**Re: Accurate Manufacturing Company / Franklin County
Industrial Storm Water Permit 4GR00477*DG**

Dear Ms. Merrill:

This letter is written in regard to the storm water inspection that I conducted at the Accurate Manufacturing Company, located at 1940 Lone Eagle Street, Columbus, Ohio. The inspection was conducted on November 2, 2010, to determine compliance with your industrial storm water permit. Your facility machines metal and operates hydraulic and pneumatic presses. The following items were noted during the inspection:

1. The facility had excessive oil staining on the pavement and ground in the rear of the building. Please see attached pictures. The oil should be removed from the pavement and ground. Wash water from removing the oil from the pavement should not be directed to a storm water drain. Please see attached pictures.
2. There was a dumpster that is used to store metal shavings located in the rear of the building that should be covered immediately.
3. There were two drums stored upside down with a lid in the rear of the building. Please store the drums upright and with a lid or store them inside the building.
4. There is a storm water drain near the entrance that appears to be collecting a lot of sediment. Controls should be put in place to prevent excessive sediment from discharging to the storm water drain. Please see attached picture.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
