Re: Keny Road Extension Project / Madison County

Dear Mr. Hume:

This letter is written regarding the construction storm water inspection that I conducted of the Keny Road Extension project on October 20, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following issues associated with construction activities at this site:

Sediment and Erosion Control:

- Be aware the General Permit states that all barren areas including stockpiles which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days. Given the time of year alternate erosion control measures such as erosion control matting, crimped mulching, mulch with netting and/or tackifier, or an approvable alternative must be implement for this site to ensure effective erosion control for the upcoming winter months. Please see attached pictures.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851 or email at greg.sanders@epa.state.oh.us.

Sincerely,

Gregory L. Sanders
