RE: HUNT IMAGING LLC

SQG>>CESQG

Mr. Mark Matthews
Hunt Imaging LLC
210 Sheldon Road
Berea, OH 44017

Dear Mr. Matthews:

On August 11, 2011, Ohio EPA conducted a compliance evaluation inspection of Hunt Imaging's (Hunt), Berea facility to determine Hunt's compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code and the Ohio Administrative Code ("ORC" and "OAC" respectively). Hunt was represented by and you. The Ohio EPA was represented by Ed D'Amato and me. The Ohio EPA's compliance inspection included an inspection of the facility operations and a review of written documentation.

Hunt notified as a small quantity generator (SQG) of hazardous waste in 1997. A SQG generates between 100 and 1000 kilograms (~220 and 2200 pounds) of hazardous waste in a calendar month. At the time of the inspection, Hunt was a conditionally exempt small quantity generator of hazardous waste (between 0 and 100 Kilograms).

Based on this inspection, Ohio EPA has determined that Hunt has violated at least the following state hazardous waste regulations:

Violations:

1. ***Used Oil Storage Requirements for Generators, OAC rule 3745-279-22(C):*** All containers and above ground tanks of used oil shall be clearly labeled or marked "Used Oil".

There were two containers of used oil that were not labeled with the words "used oil".

You labeled all of the containers during the inspection abating the violation. No further action is required.

2. ***Labeling/marking- standards for small quantity handlers of universal waste, OAC rule 3745-273-14(E):*** Universal waste [fluorescent] lamps shall be labeled as "Universal Waste - Lamps," "Waste Lamp(s)", or "Used Lamp(s)."

The boxes of universal waste lamps were not labeled at the time of the inspection.

You labeled all of the containers during the inspection abating the violation. No further action is required.

3. **Labeling/marketing- standards for small quantity handlers of universal waste, OAC rule 3745-273-14(A):** Universal waste batteries shall be labeled as "Universal Waste - Batteries," "Waste Battery(ies)", or "Used Battery(ies)."

In lieu of labeling all of the batteries individually, you can place the batteries in a container that is labeled appropriately. Please note, this container does not need to be kept closed unless the batteries are leaking or damaged.

You labeled all of the containers during the inspection abating the violation. No further action is required.

In addition, Ohio EPA has the following concerns.

4. Ohio EPA noted several manifests where the treatment/storage and disposal facility (TSDF) stated that the waste received did not conform with the profile. Hunt should ensure that they understand why the TSDF claims there is an issue and the Hunt concurs with any changes to the manifests. While CESQGs don't have to use land disposal restriction forms, if one was used, be sure to make any corrections to the generator copy so the correct information is retained in your records.
5. You stated during the inspection that while Hunt may be a CESQG, Hunt would like to be in compliance with the SQG rules. To this end, Ohio EPA would recommend that Hunt move or acquire additional spill control equipment and move it closer to the hazardous waste accumulation area. In addition, Hunt should conduct weekly inspections of the hazardous waste accumulation area, conduct tests (inspections) of the emergency equipment and post the emergency information next to a telephone. I gave you examples of all three during the inspection.
6. Prior to 1996, Hunt was a large quantity generator (LQG) of hazardous waste. We discussed the generator closure requirements during the inspection. As such, the area where you accumulated the hazardous waste is subject to the generator closure performance standard as found in OAC rule 3745-66-11. You were not sure if the accumulation area is the same as the one Hunt is currently using. If you would like to pursue the generator closure, I will be happy to assist you with this. If Hunt has the weekly inspection logs for the time period that Hunt was an LQG for review, this would perhaps allow Hunt to meet the generator closure performance standard.

For further guidance on generator closure, I have attached an excerpt from the Ohio EPA's Closure Performance Review Guidance that discusses generator closure.
