Dennis Rehfuss
Greater Cleveland Regional Transit Authority
2501 Harvard Avenue
Newburgh Heights, OH 44105

Dear Mr. Rehfuss:

On July 20, 2010, this writer, representing the Ohio Environmental Protection Agency (Ohio EPA), Division of Hazardous Waste Management, conducted a compliance evaluation inspection (CEI) at the Greater Cleveland Regional Transit Authority facility located in Newburgh Heights, Ohio. The facility was inspected to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and the rules promulgated thereunder in Chapter 3745 of the Ohio Administrative Code (OAC).

The inspection included a review of the facility's operations, management of wastes, and records. The facility was inspected for the requirements of a conditionally exempt small quantity generator (CESQG) of hazardous waste.

Ohio EPA identified the following violations of Ohio's hazardous waste laws. In order to correct the violations listed below, the facility must do the following and send me the requested information **within 30 days** of the date of this letter.

1. Waste Evaluation, OAC rule 3745-52-11:
Any person who generates a waste, as defined in OAC rule 3745-51-02, must determine if that waste is a hazardous waste.

The facility failed to evaluate a 55-gallon drum accumulating in outdoor hazardous waste storage area. The contents of the drum could not be verified during the inspection.

In order to abate this violation, the facility must evaluate the contents of the drum and indicate how it will be managed.

2. Used Oil Labeling, OAC rule 3745-279-22(C)(1):
Containers used to store used oil at generator facilities must be labeled or clearly marked with the words "used oil."

The facility failed to label the following used oil containers:

- (a) One 55-gallon drum used for oil changes; and
- (b) 2,000-gallon used oil aboveground storage tank.

These violations were abated during the inspection by labeling the containers as "Used Oil." No further response to this violation is required.

3. Universal Waste Lamps, OAC rule 3745-273-13(D)(1):
Containers of universal waste lamps must remain closed.

The facility failed to keep three containers of universal waste lamps closed during accumulation.

In order to abate this violation, the facility must submit a photograph demonstrating the containers are closed.

4. Universal Waste Lamps, OAC rule 3745-273-14(E):
Containers of universal waste lamps must be labeled or marked with the words "universal waste lamps, used lamps, or waste lamps."

The facility failed to label three containers of universal waste lamps.

In order to abate this violation, the facility must submit a photograph demonstrating the containers are labeled.

Comments:

5. The facility should evaluate the contents of the drums located outside the hw storage area. The drums were reportedly empty, but some appeared to be collecting rain water since the bungs were missing. **In order to address this concern, the facility must evaluate the contents of the drums and indicate how they will be managed.**
6. The following technical assistance documents were provided to you during the inspection:
- Universal Waste Rules for Handlers of Lamps;
 - Regulation of Used Oil;
 - Properly Managing Your Hazardous Waste Containers; and
 - CESQG checklist.
