CUYAHOGA COUNTY; NOTICE OF VIOLATION/RETURN TO COMPLIANCE**

OHR 000 109 017

Dear Ms. Good:

On July 8, 2010, Mr. Ed Damato and I, representing the Ohio Environmental Protection Agency (EPA), conducted a hazardous waste compliance inspection of the GrafTech facility located at 12300 Snow Road in Cleveland, Ohio. GrafTech was represented by you. The purpose of the inspection was to determine GrafTech's compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). One violation of Ohio's hazardous waste rules was found during this inspection and was abated when you provided photographic documentation via your e-mail dated July 15, 2010. The violation is described below.

VIOLATION

1. OAC rule 3745-273-13(D)(1). Universal waste lamps must be stored in containers or packages that are structurally sound, adequate to prevent breakage, and.... Universal waste lamps must be placed into a container that is closed....

During our inspection of your hazardous and non-hazardous waste storage area, we observed containers of Universal Waste Lamps that were not being managed in accordance with OAC rule 3745-273-13(D)(1). One long (8 foot) fluorescent lamp extended beyond the container, thereby preventing the container from being closed and increasing the possibility the lamp could be broken. Upon discovery of this situation, you made arrangements to obtain a container of adequate size to accommodate the universal waste lamp and allow the container to be closed. In addition to the container described above, we also observed two other containers that were not closed.

I received your e-mail on July 15, 2010, with the photographs of the new container for the 8 foot fluorescent lamp and the other containers, all of which were labeled with the words, "Universal Waste - lamps", and closed, fulfilling the requirements of OAC rule 3745-273-13(D)(1) and **thereby returning GrafTech to compliance**. There is no further action required.

The inspection at the GrafTech facility included a tour of the process line where we observed treated graphite flake being introduced into a furnace. The graphite is eventually compressed to thin sheets which can be used in a variety of applications such as carbon risers in furnaces.

At the end of the process tour, we observed waste graphite "worms" (non-hazardous) that are currently being discarded and sent to a solid waste landfill; the waste is relatively pure graphite. We suggested that you, or a GrafTech representative, explore the Ohio Materials Exchange website to see if the waste graphite worms could be recycled or reclaimed. We also suggested GrafTech contact Dave Foulks with Ohio EPA's Office of Compliance Assistance and Pollution Prevention (OCAPP). Mr. Foulks may be able to assist GrafTech with alternate uses or applications for the graphite worms. He can be reached at 1-800-329-7518 or at the following web address:

- Example of Emergency information to be posted by the telephone;
- Example Inspection log;
- Summary tables of generator requirements and recordkeeping requirements.

**GENERATOR LDR CHECKLIST
DOES NOT APPLY TO CESQGS**

GENERAL REQUIREMENTS

- | | | | | |
|----|--|---|-----------------------------|---|
| 1. | If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07 (A)(7)] | Yes <input type="checkbox"/> | No <input type="checkbox"/> | N/A <input checked="" type="checkbox"/> |
| 2. | Did the generator determine if the HW/soil must be treated to meet the LDR treatment standard prior to disposal? Generator knowledge or testing may be used. [3745-270-07(A)(1)] | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | N/A <input type="checkbox"/> |

NOTE: This is done by determining if the HW /soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07 (A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

- | | | | | |
|----|--|---|-----------------------------|------------------------------|
| 3. | Does the generator have documentation of how he determined whether the HW/soil meets or does not meet the LDR treatment standard in 2, above? FOR EXAMPLE: F006 that exhibits the characteristic for silver or K062 that is corrosive, D002. Review LDR treatment standard in 3745-270-40 to determine what constituents the listed HW is treated for.

- | | | | | |
|----|---|---|-----------------------------|------------------------------|
| 6. | Did the generator determine if its characteristic HW contains underlying hazardous constituents that need to be treated? [3745-270-09(A)] | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | N/A <input type="checkbox"/> |
|----|---|---|-----------------------------|------------------------------|

NOTE: This is done by evaluating which underlying hazardous constituents (UHC) are in the HW at levels above the universal treatment standards given in 3745-270-48. This requirement does not apply to high total organic carbon (i.e., contains >10% TOC) D001 wastes or listed HWs.

NOTE: Written documentation of this determination is not required.

- | | | | | |
|----|---|------------------------------|--|------------------------------|

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:

https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
