**RE: FREDON
OHD 048 110 779
SQG>NON-GENERATOR
LAKE COUNTY
NOTICE OF VIOLATION/RETURN TO
COMPLIANCE**

Mr. Jim Landry
Fredon
7911 Enterprise Drive
P.O. Box 600
Mentor, Ohio 44061-0600

Dear Mr. Landry:

On April 13, 2011, the Ohio Environmental Protection Agency (EPA), Division of Materials and Waste Management (DMWM) and the Division of Air Pollution Control, conducted a compliance evaluation inspection at Fredon, located at 7911 Enterprise Drive, Mentor, Ohio. We inspected Fredon to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Fredon was represented by you and Ed Kunas. The Ohio EPA was represented by me and Pam Korenewych.

Fredon manufactures precision machined components and assemblies for various industries. Fredon is listed in Ohio EPA's records as a small quantity generator of hazardous waste. Based on the inspection it appears that Fredon is non-generator of hazardous waste. Ohio EPA will update its records to reflect Fredon's status as a non-generator of hazardous waste.

No violations of the universal waste rules were noted. The following violation of the used oil rules was noted during this inspection. I have enclosed copies of the inspection checklists for your records.

1. Ohio Administrative Code (OAC) 3745-279-22(C) (1); Containers and above ground tanks that are used to store used oil must be labeled with the words, "Used Oil."

A 550 gallon tank used to collect used oil was labeled "waste water based machine coolant" and not labeled "Used Oil" as is required by this rule. We discussed whether or not the material in the tank is used oil and exchanged several e-mails to resolve the labeling issue.

Mr. Jim Landry

After consulting with Ohio EPA's Regulatory Services unit, I e-mailed you USEPA's interpretation of used oil as set forth in the Federal Register. By definition, the spent cutting fluid is considered used oil. The manner in which Fredon has been managing the used oil is appropriate since it is shipped off site as a used oil/water/coolant and the material goes to a registered used oil recycler. This violation was abated on April 27, 2011 when you emailed me a picture of the tank labeled with the words "Used Oil." No further action is required by you.

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.

You can find copies of the rules and other information on the hazardous waste division's web page at: <http://www.epa.state.oh.us/dhwm>. Ohio EPA also has helpful information about pollution prevention at the following web address: <http://www.epa.state.oh.us/opp>.

On April 18, 2011, the Division of Hazardous Waste Management and the Division of Solid and Infectious Waste Management combined to form the Division of Materials and Waste Management. The former Division of Hazardous Waste Management created an electronic news service to provide you with updates related to hazardous waste activities in Ohio. You can find more information and sign up for this free service at the following Web link: http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfg/php/enduser/doc_serve.php?2=subscriptionpage.

Should you have any questions or concerns, please do not hesitate to call me at (330) 963-1162.

Sincerely,

Marlene M. Kinney
