**RE: KEN TOOL, OHD 001 882 737, SUMMIT COUNTY, CEI, NOTICE OF VIOLATION/PARTIAL RETURN TO COMPLIANCE**

Dear Mr. Kusner:

On March 30, 2010, Ohio EPA's Division of Hazardous Waste Management, represented by Edward D'Amato, inspected Ken Tool located at 768 E. North Street in Akron for compliance with Ohio hazardous waste laws and regulations found in Chapters 3734 of the Ohio Revised Code (ORC) and 3745 of the Ohio Administrative Code (OAC). Ken Tool was represented by you.

Ken Tool makes safety cages for commercial truck tires, hand tools for changing commercial truck tires. The facility is a small quantity generator (between 220 and 2200 lbs per month).

The following waste streams were identified:

- Mixed paint waste (water based and solvent based).
- Paint filters (non-hazardous per analytical data).
- Used cutting and lubricating oils.
- Heat treat/quench oil.
- Universal waste lamps.
- Universal waste batteries.
- Aerosol cans.

The following violations were found. In order to correct them you must do the following and send me all requested information **within 30 days** of the date of this letter:

**1. Dating of Containers (SQG)  
OAC 3745-52-34(D)(4)**

*A Small Quantity Generator of hazardous waste may accumulate hazardous waste without a permit, provided that the date upon which each period of accumulation and/or treatment begins is clearly marked and visible for inspection on each container;*

There was one container of hazardous waste not labeled per this rule. To correct this violation, you must add the accumulation date on the container, photograph it, and send the photograph to this office.

**2. General Inspection Requirements**  
**OAC 3735-66-74**

*The owner or operator shall inspect areas where containers are stored at least weekly, looking for leaks and for deterioration caused by corrosion or other factors*

You have not been conducting weekly inspections of your hazardous waste accumulation area. To correct this violation, you must immediately begin conducting the inspections and recording them in a log. You must submit copies of the log to this office showing that at least two weekly inspections have been completed. Please note that inspection logs must be kept for 3 years.

**3. Emergency Equipment Inspections**  
**OAC 3545-65-33**

*All communication and emergency equipment shall be tested and maintained as necessary to assure proper operation in time of emergency...The owner or operator must record the inspections in a log or summary.*

You have not been conducting inspections of your emergency equipment. To correct this violation, you must immediately begin conducting the inspections and recording them in a log or summary. You must submit a copy of the log or summary showing that one inspection has been completed. Please note it is up to the facility to determine the inspection interval for emergency equipment. You must notify this office, in writing, what the inspection interval will be.

**4. Emergency Response Information**  
**OAC 3745-52-34(D)(5)(b)**

*A small quantity generator shall post the following information next to the telephone:*

- (i) The name and telephone number of the emergency coordinator*
- (ii) Location of fire extinguishers and spill control material and if present, fire alarms and;*
- (iii) The telephone number of the fire department unless the facility has a direct alarm.*

You did not have emergency response information posted per this rule. On April 5, 2010, you submitted a photograph via e-mail showing this has been corrected. No further action is required regarding this violation.

**5. Land Disposal Restrictions  
OAC 3745-270-07 (A)(2)(a)**

*With the initial shipment of waste to each treatment, storage, or disposal facility, the generator shall send a one-time written notice to each treatment, storage or disposal facility receiving the waste and place a copy in the generator's files... The certification statement shall be signed by an authorized representative of the facility*

You did not have an LDR form for your mixed paint waste stream. To correct this violation, you must submit a copy of the LDR form to this office. Please note that you must retain a copy of the form at your facility. Any changes in the waste stream will require a new form.

**6. Universal Waste Management Standards—Containers  
OAC 3745-273-13(D)**

*A small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound and adequate to prevent breakage...such containers must be kept closed and must lack evidence of leakage, spillage or damage*

There was one box of lamps that was not labeled and closed per these rules. This violation was corrected during the inspection when you closed the box. No further action is required regarding this violation.

**7. Used Oil Storage Requirements for Generators (Labels)  
OAC 3745-279-22(C)**

*Containers and above ground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words "Used Oil"*

There were several drums of used oil that were not labeled per this rule. On April 5, 2010, you submitted photographs showing 4 drums had been labeled. You explained that you will label the remaining drums. This is sufficient to correct this violation. Provided you label the remaining drums, no further action regarding this violation will be required.

Ohio EPA has the following suggestions for Ken Tool. Ken Tool is under no obligation to implement any of them. Please note that any links to specific companies are provided for informational purposes. Ohio EPA does not recommend specific products or companies. This information was also sent to you via e-mail on April 9, 2010:

1. Ken Tool may benefit from an energy audit. The US Department of Energy has an energy assessment program. More information can be found at:

<http://www1.eere.energy.gov/industry/saveenergynow/assessments.html>

The Ohio Department of Development, Office of Energy Efficiency offers various resources to assist Ohio companies in reducing energy usage. More information can be found at:

<http://development.ohio.gov/cdd/oeec/services.htm>

2. Ken Tool may be able to reduce solvent use through the use of "poly pigs" to clean paint lines. Below are some resources and information from Ohio EPA's Office of Compliance and Pollution Prevention about the technology. These and other resources were e-mailed to you on April 14, 2010:

3. You are currently disposing of empty aerosol cans as solid waste. It is possible to recycle empty aerosol cans as scrap metal. However, scrap metal recyclers usually prefer that the cans be punctured. Several aerosol can puncturing devices are commercially available and are easily found on the internet.

Please note that the definition of "empty" for containers with hazardous waste residues can be found in OAC 3745-51-07. To be considered empty, all wastes must be removed by using the practices commonly employed to remove material from that type of container, e.g., pouring, pumping, or aspirating; and

- a. no more than 2.5 centimeters of residue remain on the bottom of the container OR;
- b. no more than 3% by weight of the total capacity of the container remains in the container or inner liner if the container is less than or equal to one hundred nineteen gallons in size OR;
- c. no more than 0.3% by weight of the total capacity of the container remains in the container or inner liner if the container is greater than one hundred nineteen gallons in size.

4. You may be interested to know that the Ohio Department of Development offers financial assistance to businesses for capital investment needs such as: renovation, equipment purchases, land and building acquisition, construction, and expansion.

The Office of Compliance Assistance and Pollution Prevention website at: <http://www.epa.ohio.gov/ocapp> is also a good source of information.

The Division of Hazardous Waste Management has created an electronic news service to provide timely updates on rule changes and other news related to hazardous waste in Ohio. We encourage you to sign-up for this free service at: <http://www.epa.ohio.gov/dhwm>.

Enclosed is a copy of the checklists used for the inspection.

Please feel free to contact me at (330) 963-1170 if you have any questions.

Failure to list specific deficiencies or violations in this communication does not relieve Ken Tool from the responsibility of complying with all applicable Ohio EPA laws and regulations. Please be advised that present or past instances of non-compliance can continue as subjects of pending or future enforcement actions.

**USED OIL INSPECTION CHECKLIST  
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

**NOTE:** 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at [https://www.comapps.ohio.gov/sfm/fire\\_apps/bust/bustr/PublicInquiry.asp](https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp) to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:
