RE: Emissions Units P013, P014 and P015 reporting requirements
Facility ID: 0868030048

Warning Letter

Dear Mr. Clyburn:

The Regional Air Pollution Control Agency (RAPCA) has recently been reviewing our files to determine whether or not facilities are in compliance with any recordkeeping and reporting requirements identified in permit terms and conditions. Upon review of Parker Hannifin Corporation's- Eaton Plant (Parker Hannifin) files, RAPCA identified that the permit for air emissions units P013, Hand Zinc Plating Line, P014 Alkaline non-cyanide zinc electroplating rack line, with impingement wet scrubber control and P015, Barrel plater, zinc electroplating of steel hydraulic tube fittings, requires quarterly deviation reports be submitted to RAPCA.

Per the Permits To Operate issued 9/15/2006, Part II, Section C.2., Parker Hannifin shall collect and record the following information each day:

- a. The scrubber water flow rate, in gallon(s) per minute,
- b. A log of the downtime for the capture (collection) system, control device, and monitoring equipment, when the associated emissions unit was in operation.

In addition, per the PTO's, Part II, Section D.1., Parker Hannifin shall submit quarterly deviation reports that identify all periods of time during which the scrubber water flow rate was not maintained at or above the required levels.

Parker Hannifin has not submitted the required quarterly deviation reports for 1st, 2nd and 3rd quarters 2006 as required by the Permits To Operate for emissions units P013, P014 and P015. If there were no deviations, a report stating "no deviations" for the specified quarter shall be submitted to RAPCA. The reports shall be submitted quarterly, by January 31 (4th quarter), April 30 (1st quarter), July 31 (2nd quarter), and October 31 (3rd quarter) of each year and shall cover

Mr. Clyburn

the previous calendar quarters.

Parker Hannifin is hereby notified of the failure to submit the reports identified above. The failure to submit these reports is a violation of the Permits To Operate and Ohio Revised Code (RC) 3704.05. Parker Hannifin shall review the records for air emissions units P013, P014 and P015 and submit the required reports within 14 days of receipt of this letter. The quarterly deviation reports shall cover the time period from January 1 to October 31, 2006.

In order to demonstrate that proper recordkeeping and operational restrictions are in compliance with respect to the scrubber water flow rate, in gallon(s) per minute as well as a log of the downtime for the capture (collection) system, control device, and monitoring equipment, when the associated emissions units were in operation, Parker Hannifin shall submit the records for the months of April and October 2006.

RAPCA appreciates your prompt attention and cooperation in the above matters. If you have any questions, please feel free to contact me at 937-496-7467.

Sincerely,

Michelle L. Flanagan
Air Pollution Control Specialist
