**Re: US Corrugated, Inc. / Fairfield County
Industrial Storm Water Permit 4GR00515*DG**

Dear Mr. Clonch:

This letter is written in regard to the storm water inspection that I conducted at US Corrugated, Inc., located at 1290 Campground Road, in Lancaster, Ohio. The inspection was conducted on January 27, 2010, to determine compliance with your industrial storm water general permit. You stated that your company manufactures corrugated boxes and started production approximately two years ago. I did not note any discharge from your facility to storm water drains, waters of the state or off of your property. Overall, the facility appeared to be well-kept. Your facility was compliant with your industrial storm water general permit. The following items were noted during the inspection:

1. The facility parked the trailers in a parking lot on the east-side of the facility. Truck parking was done on the south-side of the facility. No oil was observed staining the parking lot. It was noted that there was a storm water drain down slope of the truck parking area. I recommended that oil spills should be cleaned quickly with absorbent. I also mentioned that if an oil sheen is observed in the storm water discharge, that an oil water interceptor may be recommended.
2. Power washing or outside washing of the trucks/trailers were not done at the facility.
3. Your facility had a spill prevention plan and spill kits were located through-out the facility.
4. There was no fueling station at the facility.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
