**Re: Prestress Services Industries LLC / Franklin County
Industrial Storm Water Permit 4GR00286*DG**

Dear Mr. Chessir:

This letter is written in regard to the storm water inspection that I conducted at Prestress Services Industries, LLC, located at 3550 Jackson Pike, in Grove City, Ohio. The inspection was conducted on January 20, 2010, to determine compliance with your industrial storm water permit. Your company fabricates structural precast, prestressed components. There were no pollutants discharging to storm water drains or to waters of the state. Overall, the facility was well-kept with the exception of a few drums needing lids. The following items were noted during the inspection:

1. The facility has not been in production since October of 2009. It is not expected to be in production again until spring.
2. The facility uses a sediment basin made from a depression in the compacted gravel, supplemented with concrete barriers and earth to store and collect wash water. The wash water evaporates and the remaining product is used for concrete production. Wash water was not collected on-site during the inspection since the facility had not been in production.
3. The facility had numerous drums of chemicals stored in secondary containment. A few drums did not have lids and the tarp that had been covering the drums was blown partially off the drums. Please cover the drums with lids.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
