**Re: New Summit Road High School and Elementary School  
Permit #4GC03083\*AG, December 31, 2009**

Dear Mr. Strussion:

This letter is written in follow-up to a storm water construction I conducted at Summit Road High School located in Reynoldsburg, Ohio on December 31, 2009. On this date I met with Rick Slocum of Elford construction regarding winter stabilization. During the inspection, the following items were evaluated:

**Sediment and Erosion Controls:**

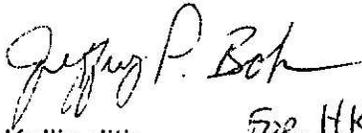

- Additional crimped straw mulch is expected for remaining barren areas in preparation for the remaining winter months. This specifically applies to the barren areas east of the stream running through the site.
- Please continue to protect the infiltration island associated with site construction. If sediment enters the areas designed for infiltration, the media may have to be replaced
- At this time, I am formally requesting additional information regarding the final discharge point to waters of the state associated with the southwestern impoundment. The Storm Water Pollution Prevention Plan (SWPPP) was unclear regarding the point of discharge to waters of the state.

Ted Strickland, Governor  
Lee Fisher, Lieutenant Governor  
Chris Korleski, Director
