**Re: Central Ohio Oil, Inc. / Franklin County  
Industrial Storm Water Permit 4GR00225\*CG**

Dear Mr. Snedegar:

This letter is written in regard to the storm water inspection that I conducted at Central Ohio Oil, Inc. located at 795 Marion Road in Columbus, Ohio. The inspection was conducted on December 28, 2009, to *determine compliance with your industrial storm water permit. I did not note any discharge from your facility to storm water drains, waters of the state or off of your property.* Overall, the facility was well-kept. The following items were noted during the inspection:

1. All storage and treatment tanks were located inside secondary containment structures. Fuel tanks also had secondary treatment. The secondary containment structures appeared to be in good sound condition.
2. The pretreatment system was located inside a building. The building had a long narrow floor drain which discharged to an oil-water separator. No spills or staining on the floor was noted.
3. There was one area of note, a fuel hose was laying over the secondary containment wall and appeared to have leaked a small amount of oil on to the ground. Please correct this as soon as possible. Please see attached picture.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
