Re: Fisher Cast Steel, Inc. / Madison County
Industrial Storm Water Inspection

4620055 9# D9

Dear Ms. Garrett:

This letter is written in regard to a brief industrial storm water inspection that I conducted on August 30, 2010, of your facility located in West Jefferson, Ohio. The following items were noted during the inspection:

The area around the "drag-out sand" storage has been cleaned and appears to be well maintained. Continue to insure that the "drag-out sand" does not discharge to storm water drains or to the street.

There were numerous uncovered barrels at the facility. The barrels need to be enclosed. If the barrels, drums, totes or fuel tanks contain a fluid or liquid, they need to be in secondary containment and under roof. Please see attached pictures.

As stated in previous correspondence, please submit an application for an industrial storm water general permit. This application can be found at the following weblink: http://www.epa.state.oh.us/dsw/storm/industrial_index.aspx.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
