**Re: Notice of Violation
Fisher Cast Steel, Inc. / Madison County
Industrial Storm Water Inspection**

Dear Ms. Garrett:

4GR 00559 + DG

This letter is written in regard to a brief industrial storm water inspection that I conducted on March 1, 2011, of your facility located in West Jefferson, Ohio. This inspection was conducted as a result of a spill of isocyanate to the storm water drain. I have conducted two previous inspections in the last 18 months due to other issues at this facility. During that time, I have requested that you submit an industrial storm water permit application. This Agency has not received an application as of this date. Please consider this a formal notice of violation. The following items were noted during the inspection:

The area around the "drag-out sand" storage area has industrial waste on the ground and discharging to several storm water drains. This area needs to be in secondary containment to prevent discharge off-site or to waters of the state. The storage dumpsters need to be covered or under roof. Please see attached pictures.

There were numerous uncovered dumpsters, drums and totes at this facility. The dumpsters, drums and totes containing industrial waste need to be enclosed and placed in secondary containment. Please see attached pictures.

There was an unloading area of sand and isocyanate. This area needs to be in secondary containment. Please see attached pictures.

As stated in previous correspondence, please submit an application for an industrial storm water general permit. This application can be found at the following weblink: http://www.epa.state.oh.us/dsw/storm/industrial_index.aspx.

The application must be submitted within 30 days and the other issues noted must be addressed within 60 days. If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

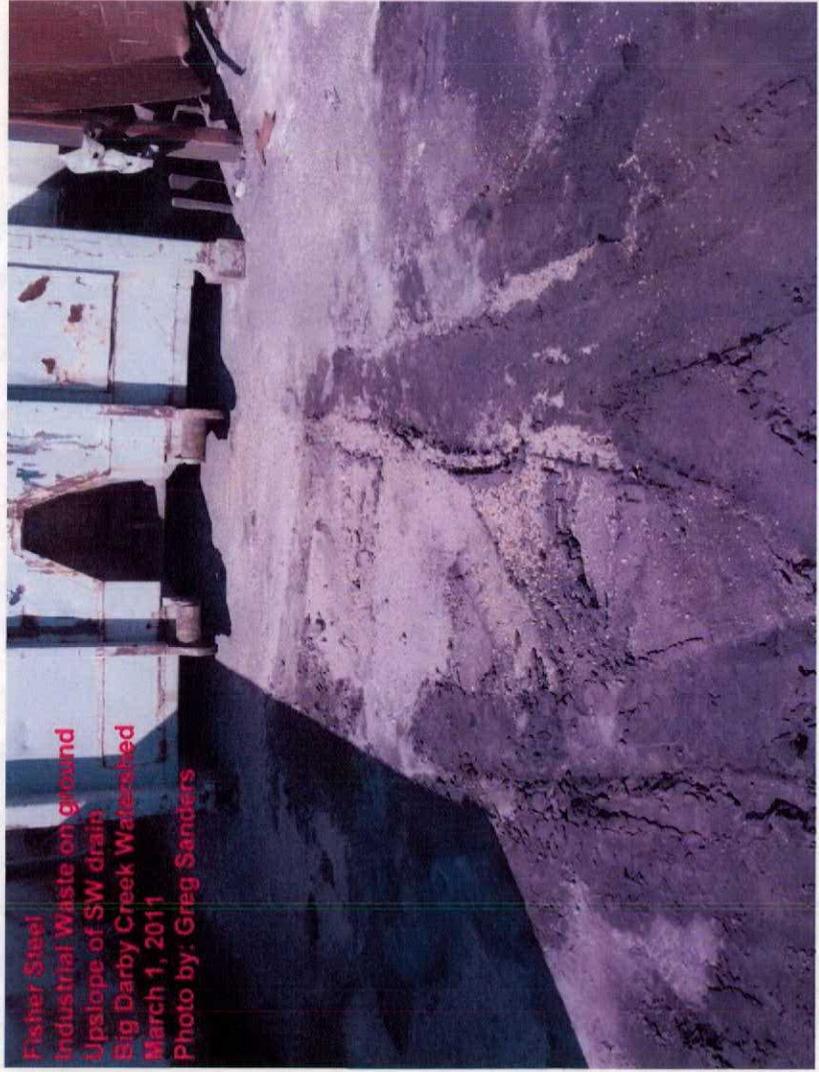

Sincerely,

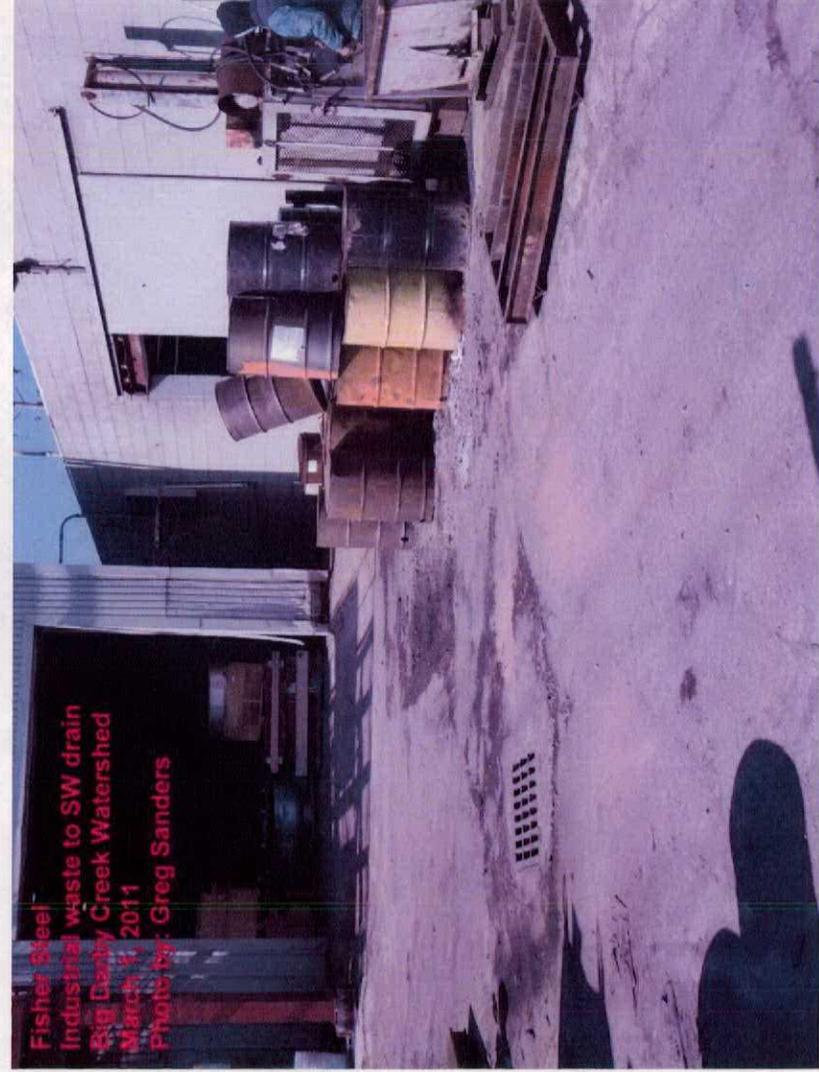

Gregory L. Sanders
