Mr. Greg Biggerman, Body Shop Manager
Mathew's Ford, Inc.
1155 Delaware Avenue
Marion, Ohio 43302

Dear Mr. Biggerman:

Thank you for accompanying me during the Ohio Environmental Protection Agency's (Ohio EPA) March 8, 2012, compliance evaluation inspection of your facility. I inspected Mathew's Ford, Inc. to determine the facility's compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). This inspection consisted of a walkthrough of the facility and paperwork review. Pollution prevention options were also discussed during this inspection. This letter will explain the violation I found and what you need to do to abate this violation.

Mathew's Ford fka Mathew's Kennedy Ford (MF) is a conglomerate of car dealerships (Honda, Acura, Hyundai, Lincoln, Chrysler, Dodge, and Jeep) including a full service body shop and automotive repair shop. For approximately 10 years, MF has been operating as a conditionally exempt small quantity generator of hazardous waste. MF employs the use of an on-site solvent distillation unit to reuse its spent solvent/paint waste generated during cleaning of its painting guns and associated equipment. Bottom solids generated from the still unit have been disposed of as a non-hazardous waste according to you. Paint booth filters are being disposed of as solid waste also as the analysis of them show no hazardous levels of contaminants. MF also generates used oil (500 gallon/mo.) which is sent to be reclaimed off-site. Fluorescent lamps are currently being replaced by a local electrical contractor (Cogburn Electric). The spent light bulbs are not accumulated on site. The light bulbs are recycled. During the inspection, MF was in the process of starting a hybrid waterborne/solvent based paint system. This process will reduce its generation of hazardous waste even further.

Based on my observations, I found the following violation of Ohio's hazardous waste laws. MF needs to immediately take the necessary measures to return to compliance with Ohio's environmental laws. Within **14 days** of receipt of this letter, MF is requested to provide documentation to this office including the steps taken to abate this violation.

1. OAC Rule 3745-52-11: Waste Evaluation

Any person, who generates a waste, as defined in Rule 3745-51-02 of the administrative code, must determine if that waste is a hazardous waste.

MF has failed to properly evaluate the solid bottoms (hockey puck) generated from the distillation of the spent paint/solvent waste.

During the inspection, you stated that you are currently disposing of still unit bottom solids in the trash. MF must not dispose of any spent booth filters as non-hazardous waste in the local landfill until a proper waste evaluation has been completed.

Within 30 days of receipt of this letter, MF shall submit the analytical results indicating the proper evaluation of the waste for Ohio EPA's review. The results must document if the waste is hazardous or not and, if hazardous, whether it is restricted from land disposal. If the waste is hazardous, MF must also submit information as to what treatment, storage, or disposal facility the waste will be sent to.

Once Ohio EPA acknowledges MF's proper characterization of the waste, MF must dispose of the waste at a proper disposal facility. MF must then submit the appropriate manifest documents or shipping papers indicating proper disposal of the waste to Ohio EPA.

If the waste is hazardous, I will determine the status of your compliance with other hazardous waste laws and notify you of my findings in a separate letter.

Ohio EPA will use the analytical data you provide, in addition to other documentation, to make regulatory and compliance decisions concerning the wastes tested. This review by Ohio EPA does not alleviate MF's responsibility to independently determine whether the wastes tested are hazardous wastes pursuant to OAC Rule 3745-52-11. The data you submit should be reviewed using a data review process, referred to as data validation, to confirm the validity of your data prior to submission. Data validation includes a review of the following components: laboratory test methods, laboratory data completeness, documentation of holding time(s), chain(s) of custody, and quality assurance/quality control (QA/QC) data.

To confirm the validity of your data, you may use Ohio EPA's tier 1 data validation plan review form which can be obtained from Ohio EPA's web page: http://www.epa.state.oh.us/dhwm/tier_i_data_validation_manual.html.

Ohio EPA may request the documentation needed to confirm the validity of the data submitted. Please submit a brief narrative of each sampling event which includes: sampling techniques used to obtain the sample and a description of how this sample was determined to be a representative sample of the waste tested.

Please note, if the waste is hazardous, you must evaluate it to determine if it is restricted from land disposal in accordance with OAC Chapter 3745-270. In addition, you must properly dispose of or recycle the waste. A copy of the waste disposal documentation and EPA waste codes applicable to the waste must be submitted to me at the Ohio EPA, Northwest District Office (NWDO) prior to disposal.

The Division of Materials and Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign up for this free service. You can find more information at http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfg/php/enduser/doc_serve.php?2=subscriptionpage. Please feel free to share this information with your colleagues.

Documentation of steps taken to return to compliance includes written correspondence, updated policies, and photographs, as appropriate, and may also be submitted via electronically to ed.pulido@epa.state.oh.us. Please be advised that violations cited above will continue until the violations have been properly abated. Failure to comply with Chapter 3734. of the Ohio Revised Code and rules promulgated thereunder may result in a civil penalty of up to \$10,000 per day for each violation. It is imperative that you return to compliance. If circumstances delay the abatement of violations, MK is requested to submit written correspondence of the steps that will be taken by date certain to attain compliance.

As we discussed during the inspection, if you find ways to recycle reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce your treatment and disposal costs. Thus, you may possibly reduce your regulatory requirements. Ohio EPA has helpful information about pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>.
