**RE: AGMET METALS, INC., OAKWOOD VILLAGE, CUYAHOGA COUNTY
OHD986976348, VARIANCE COMPLIANCE INSPECTION, NOV**

Dear Ms. Cleary:

On April 16, 2012, Kris Coder and I inspected the Agmet Oakwood facility to determine its compliance with its variance, and the Ohio hazardous waste and used oil rules and laws as found in Chapter 3745 of the Ohio Administrative Code and Chapter 3734 of the Ohio Revised Code. Our inspection included a review of your operations and records. We met briefly with Dana Cassidy and then you accompanied us on our plant tour and located facility records for us. Pictures were taken during the tour.

This is one of two Agmet facilities in Ohio. The other facility is located in nearby Maple Heights. Agmet is in the business of reclaiming metal oxides from secondary materials. The metal oxides, referred to as Metal Concentrate, are sold to smelters as feedstock. Both Agmet facilities operate with a variance from classification as a waste, granted by Ohio EPA on December 22, 2005. The variance allows this facility to accept dewatered sludge from the treatment of electroplating wastewaters (metal bearing solid wastes from the plating industry that would otherwise be considered an F006 waste) without a hazardous waste permit. This material is referred to as Variance Material. Incoming Variance Material is placed directly into the Bulk Storage Building (BSB). From there it is blended with catalysts and fed into the calciner yielding Metal Concentrate. The Metal Concentrate product is shipped out in super sacks or bulk to China and Canada.

We understand all of the catalyst material is non-hazardous. Site storm water from product areas is collected in totes and utilized for quenching/cooling purposes on-site. Spent lamps are sent off-site for recycling as universal waste. Used oil generated in the maintenance shop and from the kiln gears is containerized, and reused to lubricate shaft bearings in the plant or sent off-site for recycling as used oil.

Since last year's inspection, a shredder has been added inside the Bulk Storage Building (BSB). This unit is used to grind and shred packaging that is not considered empty so that it can be fed to the kiln for metal recovery. The shredder is located along the north wall of the BSB.

One violation was noted.

Variance Condition 2.g.

This condition requires that all specified training be completed by the specified employees once within every 12 months and be documented. One of the 5 required training modules concerning emergency response was last completed in March of 2011 so retraining is currently past due on this module. In an e-mail dated April 19, 2012, you stated you plan to have this training completed by all required staff by the end of May 2012. Please submit documentation, such as a copy of your training matrix, showing that all required staff has completed this required training.

One concern was noted during the inspection. Near the southwest corner of the facility is a curb cut in the concrete (See attached pictures #47 and #48.) with apparent oil staining in the vegetation. Please investigate what has caused the staining and what steps might be taken to prevent a recurrence.

Please be advised that the violation cited above will continue until the violation has been properly abated. Failure to comply with Chapter 3734 of the Ohio Revised Code and rules promulgated thereunder may result in a civil penalty of up to \$10,000 per day for each violation. It is imperative that you return to compliance.

We look forward to your response. A copy of the inspection checklists completed concerning universal wastes and used oil is attached. If you have any questions related to this letter, feel free to call me at (330) 963-1226 or e-mail me at sherry.slone@epa.state.oh.us.

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:

https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
