Sauder Woodworking Company
Stack Test & Return to Compliance

December 4, 2008

Mr. Vaughn Bentz, Director - Environmental Health and Safety
Sauder Woodworking Company
502 Middle Street
Archbold, Ohio 43502-0156

Dear Mr. Bentz:

The Ohio EPA (OEPA) has reviewed Sauder's report on the results of the emissions test conducted on October 9, 2008, on emissions unit B009. The company conducted this testing as part of the response to the OEPA's August 12, 2008, Notice of Violation (NOV). The NOV was issued for exceeding the allowable lb/MMBtu emission rate for VOC. The testing was conducted in conformance with Ohio EPA methods and procedures. Our review confirms the following reported data is accurate:

**Critical Test Data
(In Three Run Averages)**

	<u>VOC</u>
1. Actual Emission Rate:	0.09 lb/MMBtu
2. Allowable Emission Rate:	0.15 lb/MMBtu
3. Source Operating Rate:	61.2 MMBtu/hr
4. Maximum Source Operating Rate:	63.75 MMBtu/hr

Based on the company's response to the NOV, we have determined that the successful completion of the test has corrected the violation and B009 is being operated in compliance with the permit emission requirements. Please note, however, that this does not preclude the Director from seeking civil penalties pursuant to ORC section 3704.06 for this violation.

Mr. Vaughn Bentz, Direc Environmental Health & Safety
December 4, 2008
Page 2

The decision on whether to pursue or decline to pursue such penalties regarding this matter is dependent on several factors, one of which is the company's future compliance with applicable Ohio EPA requirements. In addition, Sauder will still need to note this deviation of the testing requirement on their 2008 compliance certification report.

Sincerely,

Mark Barber
Division of Air Pollution Control
