**PERRY COUNTY
GENERAL FILE
(THE TOY STORE)
DHWM/SEDO
OHR000130286**

Mr. Frank Correll
The Toy Store
14615 State Route 13 NW
Thornville, Ohio 43076

Dear Mr. Correll:

On June 12, 2012, Melody Stewart and I inspected The Toy Store in Thornville, Ohio, to determine compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This letter will explain the violations we found and what you need to do to correct the violations. The General Comments section of this letter will explain any other general concerns we have and what you can do to respond to those concerns.

We found the following violations of Ohio's hazardous waste laws. In order to correct these violations you must do the following and send me the required information **within 21 days** of your receipt of this letter:

- (1) **OAC Rule 3745-279-22(C), Used Oil Storage Requirements for Generators-Labeling:** Containers and above-ground tanks used to store used oil must be labeled or marked clearly with the words "Used Oil."

The used oil tote located behind the maintenance and repair garage was not labeled with the words "Used Oil."

The Toy Store labeled the used oil tote shortly after inspection, and submitted a photograph of the appropriately labeled tote to this office via e-mail on the same day as the inspection.

The Toy Store has returned to compliance with this rule. No further action is necessary to abate this violation.

- (2) **OAC Rule 3745-279-24, Off-site Shipments of Used Oil by Generators:** Generators must ensure that their used oil is transported only by transporters who have obtained a U.S. EPA identification number for the transport of used oil. Self-transportation of small amounts (55 gallons or less) is allowed, provided the used oil is transported in a vehicle owned by the generator and it is taken to a used oil collection facility that is registered with Ohio EPA to manage used oil.

Currently, The Toy Store gives their used oil to the Perry County Engineer's garage in New Lexington, Ohio. The County Engineer's garage picks up the oil from The Toy Store about once every two years to be burned in their used oil furnace. The Perry County Engineer's garage is not a registered used oil transporter or a registered used oil collection facility.

The Toy Store must ensure that their used oil is transported by a registered used oil transporter that has obtained a U.S. EPA identification number for used oil transport, **OR** self-transport no more than 55-gallons at a time in a vehicle owned by The Toy Store or one of its employees to a registered used oil collection facility. For your use in this matter, I have enclosed a list of Commercial Used Oil Recyclers who are registered to transport and recycle used oil, and a list of Used Oil Collection Facilities to whom you can self-transport in amounts of no more than 55-gallons.

To demonstrate an abatement of this violation, The Toy Store must submit to me in writing how they intend to manage their used oil in the future in order to maintain compliance with this rule.

General Comments:

- **Fluorescent Lamp Management.** I have enclosed information regarding management of spent fluorescent lamps under Ohio's Universal Waste Rule (UWR). Because all fluorescent lamps contain mercury, Ohio EPA recommends that you manage your spent lamps under the universal waste rule, if you are not already doing so. The universal waste rule eliminates many regulatory requirements such as waste evaluation, manifesting and record keeping. If you manage your spent lamps as universal waste and they will be recycled, you do not have to determine if they are hazardous waste. If you do not have your spent fluorescent lamps recycled, it is your responsibility to evaluate the lamps to determine if they are hazardous prior to their disposal. Under no circumstances should unevaluated spent fluorescent lamps be disposed of in the trash, as this could result in violations for improper/illegal disposal of a hazardous waste.
- **Scrap Tire Management.** As we discussed during the inspection, I have enclosed Ohio EPA's guidance on the proper management of scrap tires at your site until they are picked up for recycling.

Enclosed you will find a copy of the checklists that were completed during the inspection. I have also enclosed several fact sheets and lists of recyclers that you may find useful. You can find copies of Ohio's hazardous waste rules and other information on our division's web page at <http://www.epa.ohio.gov/dhwm/lawsregs.aspx>. Pollution prevention and compliance assistance information can be found at <http://www.epa.ohio.gov/ocapp>.

If you have any questions, please feel free to call me at (740) 380-5237.

Sincerely,

Vicky D. German
Division of Materials and Waste Management
Ohio EPA, Southeast District Office

VDG/dh

Enclosure

cc: Mr. Kenton Cannon, Perry County Engineer

NOTICE:

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.

FACILITY INFORMATION / PROCESS DESCRIPTION

The Toy Store is a power sports dealership in Thornville Ohio. They are a locally owned and operated Polaris and Ranger ATV business that offers sales and service. The facility has a 5-acre riding area for customers to use for demo rides. In addition to the showrooms of new and used ATVs and the maintenance/repair shop, they have large parts and accessory department.

WASTES GENERATED

Used oil and spent oil filters are generated from maintenance and repair activities. Used oil is stored in a tote located outside the maintenance shop area, and is taken off-site approximately every two years by the Perry County Engineer's garage to be burned in their used oil furnace. Spent oil filters are drained and then disposed as solid waste. Mineral spirits parts cleaner (D001) is infrequently generated. Lead acid batteries are managed through a core exchange program with Harris Battery Company in Bolivar OH. Scrap ATV tires are removed from site annually by Liberty Tire in Columbus OH. When spent fluorescent lamps are generated in the future, the company will become a Small Quantity Universal Waste Handler (SQUWH).

REGULATORY HISTORY

The company notified Ohio EPA of their hazardous waste activities in 2005 as a Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. The Toy Store was last inspected on 7/6/2005, and returned to compliance with violations found during this inspection on 7/25/2005.

CONDITIONALLY EXEMPT SMALL QUANTITY (CESQG) GENERATOR REQUIREMENTS

CESQG: <100Kg. (Approximately 25-30 gallons) of waste in a calendar month.

SQG: Between 100 and 1,000 Kg. (About 25 to under 300 gallons) of waste in a calendar month.

LQG: >1,000 Kg. (~300 gallons) of waste in a calendar month or >1 Kg. of acutely hazardous waste in a calendar month.

WASTE EVALUATION

1. Have all wastes generated at the facility been adequately evaluated? [3745-52-11] Yes No NA

GENERATOR CLASSIFICATION

2. Does the generator produce <100 kg. of hazardous waste per month?
(CESQG - Conditionally Exempt Small Quantity Generator) Yes No NA

NOTE: If quantities of hazardous waste accumulated on-site at any one time exceed 1,000 Kg. - or the generator produces between 100 and 1,000 Kg. of hazardous waste per month, it is operating as a Small Quantity Generator (SQG).

OFF-SITE SHIPMENT OF HAZARDOUS WASTE

3. Does the CESQG ensure delivery of hazardous waste(s) to an off-site permitted TSD?
[ORC §3734.02(F)] Yes No NA

TREATMENT OF HAZARDOUS WASTE

4. Does the generator treat hazardous waste in a:
- a. Container that meets 3745-66-70 to 3745-66-77? Yes No NA
 - b. Tank that meets 3745-66-90 to 3745-66-101 except 3745-66-97(C)? Yes No NA
 - c. Drip pad that meets 3745-69-40 to 3745-69-45? Yes No NA
 - d. Containment building that meets 3745-256-100 to 3745-256-102? Yes No NA

NOTE: If the CESQG conducts treatment they are subject to the LQG requirements.

NOTE: If waste is treated to meet LDRs, use the LDR checklist.

USED OIL GENERATOR COLLECTION CENTER, AND AGGREGATION POINT REQUIREMENTS

NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

PROHIBITIONS

1. Does the generator manage used oil in a surface impoundment or waste pile? Yes No N/A
If yes:
- a. Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)] Yes No N/A
2. Is used oil used as a dust suppressant? [3745-279-12(B)] Yes No N/A
3. Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)? Yes No N/A

NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., if generating used oil and shipping directly to a burner, complete generator and marketer checklists).

GENERATOR STANDARDS

4. Does the generator mix hazardous waste with used oil? If so, Yes No N/A
a. Is the mixture managed as specified in 3745-279-10(B)? [3745-279-21(A)] Yes No N/A

NOTE: Used Oil mixed with listed (3745-51-30 to 3745-51-35) or characteristic (3745-51-20 to 3745-51-24) hazardous waste are subject to regulation as a hazardous waste, unless the listed hazardous waste is listed solely because it exhibits a hazardous characteristic, and the resultant mixtures do not exhibit a characteristic. Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.

5. Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)] Yes No N/A

NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.

6. Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)] Yes No N/A
7. Are containers and aboveground tanks used to store used oil in good condition with no visible leaks? [3745-279-22(B)] Yes No N/A
8. Are containers, above ground tanks, and fill pipes used for underground tanks clearly labeled or marked "Used Oil"? [3745-279-22(C)] Yes No N/A

At the time of the inspection, the tote containing used oil in the maintenance shop area was not labeled with the words "Used Oil". The Toy Store labeled the used oil tote shortly after inspection, and submitted a photograph of the appropriately labeled tote to this office via e-mail on the same day as the inspection. The Toy Store has demonstrated abatement of this violation.

9. Has the generator, upon detection of a release of used oil, done the following: [3745-279-22(D)]
- a. Stopped the release? Yes No N/A
- b. Contained the release? Yes No N/A

- c. Cleaned up and properly managed the used oil and other materials? Yes No N/A
- d. Repaired or replaced the containers or tanks prior to returning them to service, if necessary? Yes No N/A

ON-SITE BURNING IN SPACE HEATERS

10. Does the generator burn used oil in used-oil fired space heaters? [3745-279-23] Yes No N/A
If so:
- a. Does the heater burn only used oil that owner/operator generates or used oil received from household do-it-yourself (DIY) used oil generators? Yes No N/A
- b. Is the heater designed to have a maximum capacity of not more than 0.5 million BTU per hour? Yes No N/A
- c. Are the combustion gases from heater vented to the ambient air? Yes No N/A

NOTE: Ash accumulated in a space heater must be managed in accordance with 3745-279-10(E).

GENERATOR TRANSPORTATION

11. Does the generator have the used oil hauled only by transporters that have obtained a U.S. EPA ID#? [3745-279-24] Yes No N/A

Used oil generated and accumulated by The Toy Store is picked up by the Perry County Engineer's garage approximately once every two years, to be burned in their used oil furnace. The Perry County Engineer's garage does not have an EPA ID# and is not a registered used oil transporter.

12. If the generator self-transport used oil to an approved collection site or to an aggregation point owned by the generator: [3745-279-24]
- a. Does the generator transport used oil in a vehicle owned by the generator or an employee of the generator? [3745-279-24] Yes No N/A
- b. Does the generator transport more than 55 gallons of used oil at any time? [3745-279-24] Yes No N/A

NOTE: Used oil generators may arrange for used oil to be transported by a transporter without a U.S. EPA ID # if the used oil is reclaimed under a contractual agreement (i.e., tolling arrangement).

COLLECTION CENTERS AND AGGREGATION POINTS

13. Is the DIY used oil collection center in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-30] Yes No N/A
14. Is the non-DIY used oil collection center registered with Ohio EPA? [3745-279-31] Yes No N/A
15. Is the used oil aggregation point in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-32] Yes No N/A

NOTE: Complete Used Oil Generator and any other applicable used oil handler checklist (e.g., marketer, burner, etc.) for used oil collection centers and aggregation points.

SMALL QUANTITY UNIVERSAL WASTE HANDLER REQUIREMENTS - LAMPS

Large Quantity Universal Waste Handler (LQUWH) = 5,000 Kg or more
Small Quantity Universal Waste Handler (SQUWH) = Less than 5,000 Kg (11,023 lb)

PROHIBITIONS

1. Did the SQUWH dispose of universal waste? [3745-273-11(A)] Yes No NA
2. Did the SQUWH dilute or treat universal waste, except when responding to releases as provided in 3745-273-17 or managing specific wastes as provided in 3745-273-11(B)] Yes No NA

CONTAINERS AND LABELING

8. Does the SQUWH contain lamps in containers or packages that are structurally sound, adequate to prevent breakage, and are compatible with contents of the lamps? Are containers or packages closed and do they lack evidence of leakage, spillage or damage that could cause leakage? [3745-273-13(D)(1)] Yes No NA

At the time of the inspection, there were no spent fluorescent lamps accumulated on-site.

9. Are lamps that show evidence of breakage, leakage or damage that could cause a release of mercury or hazardous constituents into the environment immediately cleaned up? Are they placed into a container that is closed, structurally sound, compatible with the contents of the lamps, and lack evidence of leakage spillage or damage that could cause leakage or releases of mercury or hazardous waste constituents to the environment? [3745-273-13(D)(2)] Yes No NA
10. Are the lamps or containers or packages of lamps labeled with the words "Universal Waste - Lamps" or "Waste Lamps" or "Used Lamps"? [3745-273-14(E)] Yes No NA

When the facility begins accumulating spent lamps, the spent lamps must be accumulated in structurally adequate containers and be labeled with the words "Universal Waste-Lamps" or "Waste Lamps" or "Used Lamps".

NOTE: Treatment (such as crushing) by a UWH is prohibited under this rule unless the facility is permitted for such activities [3745-273-31(B)]. A generator crushing lamps must manage lamps according to hazardous waste rules (OAC Chapter 3745-52). Lamp crushing is a form of generator treatment (OAC 3745-52-34). Crushed lamps must be transported by a registered hazardous waste transporter to a permitted hazardous waste facility under a hazardous waste manifest.

ACCUMULATION TIME

NOTE: Accumulation is defined as date generated or date received from another handler.

11. Is the waste accumulated for less than one year? [3745-273-15(A)] If not: Yes No NA
- a. Was the waste accumulated over one year in order to facilitate proper recovery, treatment or disposal? (Burden of proof is on the handler to demonstrate) [3745-273-15(B)] Yes No NA
12. Is the length of time the universal waste is stored documented by one of the following: [3745-273-15(C)]
- a. Marking or labeling the container with the earliest date when the universal waste became a waste or was received? [3745-273-15(C)(1)] Yes No NA
- b. Marking or labeling individual item(s) of universal waste with the earliest date that it became a waste or was received? [3745-273-15(C)(2)] Yes No NA
- c. Maintaining an inventory system on-site that identifies the date the universal waste became a waste or was received? [3745-273-15(C)(3)] Yes No NA
- d. Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers became a universal waste or was received? [3745-273-15(C)(4)] Yes No NA
- e. Placing the universal waste in a specific accumulation area and identifying the earliest start date or date received? [3745-273-15(C)(5)] Yes No NA
- f. Any other method, which clearly demonstrates, the length of time the universal waste has been accumulated from the date it became a waste or was received? [3745-273-15(C)(6)] Yes No NA

When the facility begins accumulating spent lamps, they must track how long the spent lamps have been on-site, and document this by using one of the above methods.

EMPLOYEE TRAINING

13. Are employees who handle or have the responsibility for managing universal waste informed of waste handling/emergency procedures, relative to their responsibilities? [3745-273-16] Yes No NA

RESPONSE TO RELEASES

14. Are releases of universal waste and other residues immediately contained? [3745-273-17(A)] Yes No NA
15. Is the material released characterized? [3745-273-17(B)] Yes No NA
16. If the material released is a hazardous waste, is it managed as required in OAC Chapters 3745-50 through 3745-69? (If the waste is hazardous, the handler is considered the generator of the waste and is subject to Chapter 3745-52) [3745-273-17 (B)] Yes No NA

OFF-SITE SHIPMENTS

NOTE: If a SQUWH self-transport waste, then they must comply with the Universal Waste transporter requirements.

17. Are universal wastes sent to either another handler, destination facility or foreign destination? [3745-273-18(A)] Yes No NA

NOTE: SQUWHs are prohibited to send waste to any other facility.

18. If the universal waste meets the definition of hazardous material under 49 CFR 171-180, are DOT requirements met with regard to package, labels, placards and shipping papers? [3745-273-18(C)] Yes No NA
19. Prior to shipping universal waste off-site, does the receiver agree to receive the shipment? [3745-273-18(D)] Yes No NA
20. If the universal waste shipped off-site is rejected by another handler or destination facility does the originating handler do one of the following:
- a. Receive the waste back? [3745-273-18(E)(1)] Yes No NA
 - b. Agree to where the shipment will be sent? [3745-273-18(E)(2)] Yes No NA
21. If a handler rejects a partial or full load from another handler, does the receiving handler contact the originating handler and discuss one of the following:
- a. Sending the waste back to the originating handler? [3745-273-18(F)(1)] Yes No NA
 - b. Sending the shipment to a destination facility? (If both the originating and receiving handler agree) [3745-273-18(F)(2)] Yes No NA
22. If the handler received a shipment of hazardous waste that was not universal waste, did the SQUWH immediately notify Ohio EPA? [3745-273-18(G)] Yes No NA
23. If the handler received a shipment of nonhazardous, non-universal waste, was the waste managed in accordance with applicable law? [3745-273-18(H)] Yes No NA

EXPORTS

24. Is waste being sent to a foreign destination? If so: Yes No NA
- a. Does the small quantity handler comply with primary exporter requirements in OAC 3745-52-53, 3745-52-56, and 3745-52-57? [3745-273-20(A)] Yes No NA
 - b. Is waste exported only upon consent of the receiving country and in conformance with U.S. EPA's "Acknowledgment of Consent" as defined in 3745-52-50 to 3745-52-57? [3745-273-20(B)] Yes No NA
 - c. Is a copy of U.S. EPA's "Acknowledgment of Consent" provided to the transporter? [3745-273-20(C)] Yes No NA
