Mr. Jeff Heistad
Heistad's Wrecker Service
14467 U.S. Route 23 North
Waverly, Ohio 45690

Dear Mr. Heistad:

On May 31, 2012, Vicky German and I inspected Heistad's Wrecker Service in Waverly, Ohio to determine Heistad's Wrecker Service's compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). During the inspection I also helped you identify ways to prevent pollution by reducing waste. This letter will explain the violations I found and what you need to do to correct the violations.

I found the following violations of Ohio's hazardous waste laws. In order to correct these violations you must do the following and send me the required information ***within 21 days*** of your receipt of this letter:

1. **Used oil storage requirements for generators, OAC rule 375-279-22(C)(1):** Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

During the inspection, the used oil tanks were not labeled as required above. To demonstrate compliance with this rule, the tanks must be labeled appropriately and photographic documentation must be sent to this office for review.

2. **Used oil storage requirements for generators, OAC rule 375-279-22(D):** Upon detection of a release of used oil to the environment a generator shall clean up and manage properly the release of used oil and other materials.

During the site visit, used oil contaminated soil was observed around the car crusher and the frame repair building. As required by this rule, the used oil contaminated soil must be cleaned up. To demonstrate compliance with this rule, photographic documentation must be submitted to Ohio EPA demonstrating that the contaminated soil has been cleaned up properly.

REMARKS-GENERAL INFORMATION

General Process Information:

Heistad's Wrecker Service is a scrap metal facility as well as a towing company and automobile maintenance facility. Automobiles and scrap metals (aluminum, copper, steel, etc.) are bought and then segregated and sold to other companies depending on price. Companies used in the past include Rumpke, Cohen Brothers, Exide Battery, River Metals, and PSC.

Regulatory/Enforcement History (if applicable):

This is the first full inspection of the facility.

Other:

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.
