Re: Putnam County  
W.C. Wood Company, Inc  
Premise #03 69 00 0021  
**Warning Letter**

March 3, 2008

Mr. Glenn Kaufman  
W.C. Wood Company, Inc  
677 Woodland Drive  
Ottawa, Ohio 45875

Dear Mr. Kaufman:

The Ohio Environmental Protection Agency (OEPA) issued PTI # 03-16130 to W.C. Wood on August 24, 2004, for the modification of the large appliance coating line and touch up booth (K004). The permit requires W.C. Wood to submit quarterly deviation reports in accordance with the General Terms and Conditions of the PTI.

The Division of Air Pollution Control has reviewed the facility's 4<sup>th</sup> Quarter Deviation report and Annual OC report, received on February 4, 2008. According to the deviation report, the company used more than one quart of the quick drying lacquer during one eight-hour period. Per a phone conversation with the company's consultant on February 29, W.C. Wood used three quarts of the lacquer in that eight-hour period. PTI # 03-16130 states that on any day when only quick drying lacquers are employed, in order for the emission limitation of 2.8 lbs VOC/gallon of coating excluding water and exempt solvents not to apply, the maximum usage of such lacquers shall not exceed one quart in any eight-hour period.

Please submit to our office by March 21, the action plan implemented to ensure that the one quart restriction is not exceeded on days when the e-coat paint system is not operating.

Should you have any questions or comments concerning this letter, please feel free to contact me at the above address or call (419) 373-3136.

Sincerely,

Jay P. Liebrecht  
Division of Air Pollution Control
