Subject: Resend of NOV letter to correct address.

Dear Mr. Kline-Parker:

This letter shall serve as a follow-up to the complaint investigation that was conducted at CK Technologies (CK) on June 26, 2007, by this writer from the Division of Air Pollution Control (DAPC) of the Northwest District Office (NWDO). Our office has received a complaint that claims CK is using photochemically reactive materials in their coating booth. They also alleged that the organic compounds (OC) content in the coating material is not being reported correctly. The purpose of the inspection was to determine compliance with the terms and conditions of PTI # 03-17036 issued to CK on October 4, 2005.

During my investigation, I discovered that the facility switched coating suppliers approximately 2 months ago. According to the "as applied" air quality data sheet, the coating is not photochemically reactive, as defined in OAC rule 3745-21-01. The coating has a VOC content of 2.13 lbs/gal, however the coating contains exempt solvents, which raises the OC content to 4.8 lbs OC/gal. Based on the maximum usage rate of 0.9 gal per hour, CK is exceeding their 3.76 lbs OC/hour emission limit. This is a violation of the terms and conditions of PTI # 03-17036 and ORC 3704.05. According to the PTI application, the previously used coating material did not appear to result in any violations.

This office is requesting the facility submit a written response to this letter by August 10, 2007, which includes, at a minimum, a compliance plan and schedule to correct the violation noted above. Please be advised that the submission of the requested information to respond to this letter does not constitute waiver of the Ohio EPA's authority to seek civil penalties pursuant to ORC section 3704.06. The Ohio EPA will make a decision on whether to pursue or decline to pursue such penalties regarding this matter at a later date.
