Norplas Industries, Inc.  
Stack Test Results

August 29, 2007

Mr. Mark Steinmetz  
Environmental Manager  
Norplas Industries, Inc.  
7825 Caple Road  
Northwood, Ohio 43619

Dear Mr. Steinmetz:

The purpose of this letter is to present a revision of our review of the stack test performed on March 5, 2003, on Ohio EPA emissions unit R001. This revision is based on the new operating rate information submitted by Norplas in its letter dated May 29, 2007. The material in this letter supersedes the corresponding material in our letter dated May 7, 2007.

The testing was found to have been conducted in conformance with Ohio EPA methods and procedures. Our test review confirms the following reported data is accurate:

**Critical Test Data  
(In Three Run Averages)**

Pollutant	Actual Emission Rate	Allowable Emission Rate	Source Operating Rate	Maximum Source Operating Rate
CO	1.68 lbs/hr	1.3 lbs/hr	267.9 lbs VOC/hr	288.6 lbs VOC/hr
NO <sub>x</sub>	1.83 lbs/hr	3.1 lbs/hr	267.9 lbs VOC/hr	288.6 lbs VOC/hr
VOC	4.4 lbs/hr (as carbon) 15.3 lbs/hr (as VOC)* 98.2% DRE** 98.1% DRE***	47.2 lbs/hr 95% control efficiency	267.9 lbs VOC/hr	288.6 lbs VOC/hr

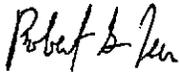

\* Assuming VOC is all melamine.  
\*\* Using Method 25A at RTO inlet.  
\*\*\* Using method 25 at RTO inlet.

Mr. Mark Steinmetz

Page Two

Please note that the emission unit was not being operated in compliance with its allowable emissions rate for CO. The facility is therefore in violation of the Title V permit terms and conditions A.I.2.a.viii and A.V.3.h for this emissions unit, and is also in violation of Ohio Revised Code 3704.05. The facility has submitted a request to Ohio EPA in order to remedy this violation.

You may contact your county engineer, Mohammad Smidi, should you have any questions and/or comments regarding this letter at (419) 373-3118.

Sincerely,

Robert G. Teer  
Division of Air Pollution Control
