RE: AMERICAN METAL COATINGS, OH0000147868, CUYAHOGA COUNTY, LQG NOV-RTC

Dear Mr. Dotsikas:

On June 20, 2012, Sheryl Slone and this writer, representing Ohio EPA, Division of Materials and Waste Management (DMWM), visited American Metal Coatings, Inc. (AMC), located at 1088 Ivanhoe Road in Cleveland, Ohio to conduct a hazardous waste compliance evaluation inspection (CEI). Subsequently, on July 12, 2012, this writer conducted a follow up inspection at the AMC facility. During the inspections, AMC was represented by Vasilios (Bill) Dotsikas, Nabil Iskander, Mildred Rodriguez, Hollis Woods and you.

On July 2, July 5 and July 11, 2012, AMC submitted documentation concerning waste evaluation information, container and waste management, container inspections, personnel training and a summary of clean up activities at process lines two through six.

The purpose of the inspections was to determine AMC's compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). The inspection included a review of the facility's operations, as well as written documentation. AMC was inspected for the requirements of a large quantity generator (LQG) of hazardous waste.

Information obtained pertaining to AMC's processes and waste generation is discussed on the Process Description-Waste Activities Summary Sheet within the enclosed inspection checklists.

Based on the inspections, Ohio EPA identified the following violations:

1. **Waste Evaluation, OAC rule 3745-52-11:** Any person who generates a waste must evaluate that waste to determine if it is a hazardous waste in accordance with the criteria set forth in OAC Chapter 3745-51.

AMC failed to evaluate the waste stream consisting of spent aerosol cans. During the July 12, 2012 re-inspection, AMC was collecting the spent aerosol cans in a container labeled as hazardous waste. **This violation has been adequately addressed. No further response is requested.**

2. **Labeling and Dating Hazardous Waste Accumulation Containers, OAC rule 3745-52-34(A)(2):** While being accumulated on-site, each container with hazardous waste contents must be labeled with the words "Hazardous Waste" and with an accumulation date that is clearly marked and visible for inspection.

During the June 20, 2012 inspection of the hazardous waste accumulation area, located between plating lines one and two, two totes were not positioned in a manner that allowed the accumulation period to be visible for inspection. During the July 12, 2012 re-inspection, the totes in this area were positioned in a manner to allow access to the hazardous waste labels. **This violation has been adequately addressed. No further response is requested.**

3. **Recordkeeping, OAC rule 3745-52-40(A):** A signed copy of the manifest from the designated facility must be retained for at least three years from the date the waste was accepted by the initial transporter.

AMC failed to retain a copy of nine manifests from the designated facility. During the June 20, 2012 inspection and on July 11, 2012, AMC obtained/provided copies of the manifests from the designated facility. **This violation has been adequately addressed. No further response is requested.**

4. **Required Aisle Space, OAC rule 3745-65-35:** The owner or operator shall maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment and decontamination equipment to any area of the facility operation in an emergency.

AMC failed to maintain adequate aisle space between totes of hazardous waste at the accumulation area located between plating lines one and two. During the July 12, 2012 re-inspection, the totes in this area were positioned in a manner to allow for adequate aisle space. **This violation has been adequately addressed. No further response is requested.**

5. **Inspections of Containers, OAC rule 3745-66-74:** The owner or operator must inspect areas where hazardous waste containers are stored, at least weekly, looking for leaks and for deterioration caused by corrosion or other factors. The owner or operator must record the inspections in an inspection log or summary.

AMC failed to record inspections of the roll-off box containing filtercake (F006 hazardous waste) generated from the wastewater treatment unit for the zinc/nickel plating line. During the July 12, 2012 re-inspection, AMC provided copies of completed inspection forms for hazardous waste containers. **This violation has been adequately addressed. No further response is requested.**

NOTE: This is done by determining if the HW/soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07(A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at: https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
