RE: ADELMAN TRUCK PARTS
3GR00655*DG
STARK COUNTY

Mr. Larry Adelman
Adelman's Truck Parts
2000 Waynesburg Dr. SE
Canton, Ohio 44707

Dear Mr. Adelman:

On September 29, 2008, this writer conducted an inspection of your facility for the purpose of determining compliance with the above referenced Industrial storm water general permit. The following is a summary of my findings:

- 1) There were several areas of oil stained soils observed during the inspection. While this is inherent with this type of business, a procedure should be established to periodically remove oil stained soils throughout each year. Pictures of some of these areas were taken and are attached.
- 2) Over 20 used batteries were observed adjacent to the cutting pad on the hill. Batteries must not be stored outside and they must be moved indoors to a secure location.
- 3) When asked to review the Storm Water Pollution Prevention plan (SWPPP), it could not be produced. The plan must be available upon request during an inspection. It must be updated as site conditions change.

It would be advisable for you to review your general permit for any new requirements that may be applicable. The last SWPPP we have on file for your facility is dated 1993. Please submit your current SWPPP within 15 days of receipt of this letter. We will review it and forward our comments back to you. If you should have any questions concerning this letter, feel free to contact this writer at (330) 963-1136.

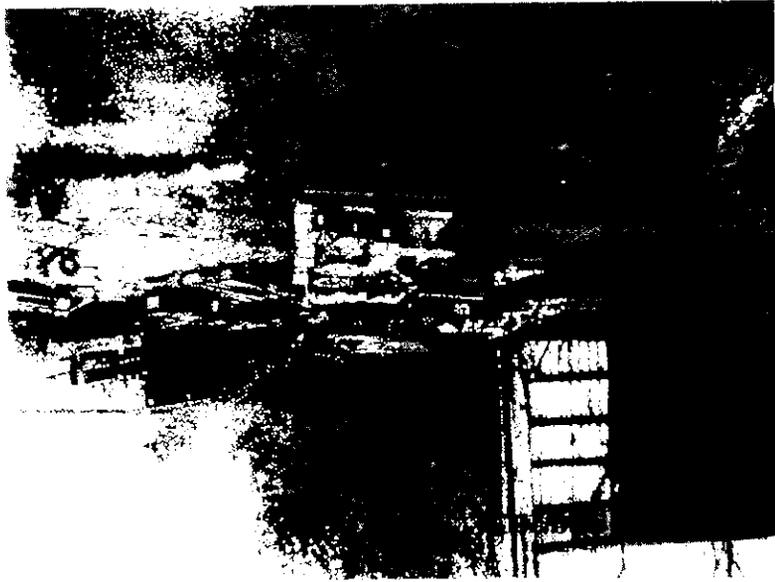

Sincerely,

Philip P. Rhodes, PE
Environmental Engineer
Division of Surface Water
