Mr. Geoffrey L. Sans, Manager
Services & Utilities
Campbell Soup Supply Company
12-773 State Route 110
Napoleon, Ohio 43545

Dear Mr. Sans:

We are in receipt of your self monitoring reports covering the months of July 2007, to November 2007, for the referenced facility. Our review indicates violations of the conditions of your NPDES permit. The specific instances of noncompliance are as follows:

- **Attached you will find a list of your permit violations, including limit, frequency, and code violations.** Please inform this office in writing **within 10 days** of receipt of this letter as to the reasons for the attached violations, as well as a description of the actions taken or proposed to prevent any further violations. Your response should include the dates, either actual or proposed, for completion of the actions.

Please be advised that failure to comply with the effluent limitations and/or monitoring requirements, including adequate laboratory controls, appropriate quality assurance procedures, and records retention, as specified in your Part III-General Conditions of your NPDES permit may be cause for enforcement action pursuant to Ohio Revised Code, Chapter 6111. If these violations continue to occur and if satisfactory progress is not made, it may be necessary to initiate enforcement actions to achieve compliance.

The Ohio EPA strongly encourages pollution prevention as the preferred approach for waste management. The first priority of pollution prevention is to eliminate the generation of wastes and pollutants at the source (source reduction). For those wastes or pollutants that are generated, the second priority is to recycle or reuse them in an environmentally sound manner. You can benefit economically, help preserve the environment, and improve your public image by implementing pollution prevention programs.

Dear Environmental Dept. Representative:

Enclosed is one copy of Form 1 and 2 Applications for renewal of your National Pollutant Discharge Elimination System (NPDES) permit. If the facility discharges storm water associated with industrial activity, excluding construction and that wastestream is to be authorized by the renewal permit then you must also submit a Form 2F. If a different form is needed it may be obtained by calling (614) 644-2156 or by going to the Ohio EPA website <http://www.epa.state.oh.us/dsw/permits/npdesform.html>.

In the space provided for "EPA I.D. number" in the application, use the NPDES number, which for your permit, is 2IH00021. File two paper copies of the application with Ohio EPA Northwest District Office 347 N. Dunbridge Road, Bowling Green, OH 43402 and one electronic version using SWIMware. If you have questions regarding the electronic submittal of the application, please check the SWIMware website at: <http://www.epa.state.oh.us/dsw/swims/swimintro.html> or call the SWIMware Hotline at (614) 644-2050. When you first save the electronic copy in SWIMware you must provide a name for the application; please use the following name: 2IH000212007. Do not file the paper or electronic versions of the application with the U.S. EPA.

Filing of this application for the NPDES permit does not relieve you of the responsibility of filing applications for other permits that may be appropriate. Regulation requires this application to be signed only by the person authorized as described in the instructions Section B, Form 1. The application must be received by the Ohio EPA no later than 180 days prior to the expiration date of your permit, unless the permit contains an earlier submittal date.

Revised Code 3745.11 requires that a non-refundable application fee of \$200.00 accompany the application. The check should be made payable to the "Treasurer of the State of Ohio".

In order to address issues related to OAC 3745-1-05 (Antidegradation Rule), also complete and submit the enclosed antidegradation addendum.

Should there be any questions regarding this matter, please feel free to contact the Northwest District Office at 419-352-8461.

Sincerely,
