Re: Lucas County  
Textileather Corp.  
NPDES Permit

September 5, 2008

Ms. Nicole Zielinski  
Environmental Coordinator  
Textileather Corp.  
3729 Twining Street  
Toledo, Ohio 43608

Dear Ms. Zielinski:

On August 12, 2008, I inspected the wastewater discharge outfalls at your facility. The discharge from the plant is from three outfalls regulated by an NPDES discharge permit.

All outfalls discharge either noncontact cooling water and /or storm water runoff. Outfalls 001 and 002 were discharging during the inspection and outfall 003 had no flow.

Sources of discharge from outfall 003 are storm water runoff from the roof and some drains outside of the storage building. Recent monthly discharge reports for this outfall indicated exceedance of suspended solids concentration limitations. Review of the housekeeping around these sources indicate a potential for contaminants to be discharged.

Your NPDES permit renewal application appears complete and will be processed soon. If you have any questions, please contact me at (419)373-3017.

Sincerely,

Naajy S. Abdullah, P.E.  
Division of Surface Water
