**Re: Notice of Violation of the 2006 Hazardous Waste Annual Report Requirement / Return to Compliance
Advance Bronze Inc. – OHD048430789**

Dear Mr. Stutz:

The Division of Hazardous Waste Management (DHWM) has received your 2006 Hazardous Waste Annual Report on February 6, 2007. My review of this report shows that it is not complete. Ohio Administrative Code (OAC) Rule 3745-52-41 requires a generator who ships any hazardous waste off-site to prepare and submit to Ohio EPA a Hazardous Waste Annual Report and to describe the type and amounts of waste generated and shipped off-site in the previous calendar year. Because your submittal does not contain accurate data required by the rule, you are in violation. Please see the reverse side of this letter for the specific information that is missing from your report.

I have made the corrections to your report to abate the violation of OAC Rule 3745-52-41. Please review the changes made and confirm that they are accurate. If there are not, please notify me as to what they should be. You should have on file the manifest records necessary for reference. OAC Rule 3745-52-40 requires generators to keep a signed copy of each manifest for a period of at least three years from the date the waste was accepted by the initial transporter. DHWM recommends using the free software to complete and submit the report to reduce errors in the data submitted. If you have questions concerning the annual report requirements, you can reach me at (614) 644-2954 or tammy.heffelfinger@epa.state.oh.us.

Sincerely,

Tammy Heffelfinger
Annual Report Coordinator
Regulatory and Information Services
Division of Hazardous Waste Management

Violation OAC 3745-52-41(A)(5) Quantity of hazardous waste

Advance Bronze has not completely reported the quantity of hazardous waste generated and shipped during 2006 on the GM Form. When you report a quantity of hazardous waste in units of volume such as Gallons, you are required to provide a density in pounds/gallon or specific gravity so that we can determine the weight of the waste. DHWM has used the quantity of hazardous waste Envirite reported receiving from you to calculate an approximate density for this waste of 10 pounds/gallon. Please see the attached sheet to see the quantity received by Envirite in tons. If this density is not correct, please notify me as to what it should be.
