**RE: ITEN INDUSTRIES, PLANT 1
OHD 004 160 750
COMPLAINT # 7100
NOTICE OF VIOLATION**

David Zundel
Iten Industries
PO Box 2150
Ashtabula, OH 44005

Dear Mr. Zundel:

Ed D'Amato and I of the Ohio EPA Division of Hazardous Waste Management conducted an inspection of Iten Industries, Plant 1 located at 4001 Benefit Avenue in Ashtabula, Ohio on September 23, 2008. The purpose was to investigate a complaint and determine if Iten had violations of Ohio's hazardous waste and used oil laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). A complete inspection was not conducted.

The complaint alleged drums of waste resin were upstairs over the polyester molding area. In this area we saw three drums that were full or partially full of hardened resin. You stated that once this resin is hardened it is no longer a hazardous waste. Also in this area we saw two 5-gallon jugs of a dark liquid. Steve told me that these had been here for about the last 20 years. Your October 6, 2008 letter states that this material was tested and found to be in-specification liquid catalyst modifier and that Iten is currently using this material in its process.

The complaint also alleged that there were drums of waste in a catalyst shed. You told us that the catalyst shed has been removed and catalyst is now stored in a refrigerated cabinet within the building. You showed us this cabinet and no containers labeled as waste were inside it.

Through waste shipment records, e-mails, and an October 16, 2008 phone conversation with you, it appears that Iten Plant 1 has been a Small Quantity Generator of Hazardous Waste (SQG) during at least most of the months of 2008 that have already past. This is based on 285 gallons of hazardous waste being generated over the 8.5 month period from January 18, 2008 to October 1, 2008 and 7.5 pounds/gallon of the waste. This averages out to 251 pounds/month which is over the 220 pounds/month that makes a facility a SQG. This generator status and, therefore, the applicable rules, are based on the weight of hazardous waste generated during each month and can change from month to month. A partially completed SQG inspection checklist is enclosed.

The following violations and concern were found:

1. Ohio Revised Code (ORC) 3734.02(F) – Causing hazardous waste to be transported to an unpermitted facility.
ORC 3734.02(F) states that no person shall cause hazardous waste to be transported except to (in general) a facility operating under a hazardous waste permit.

Iten violated ORC 3734.02(F) by causing the transportation of 6 containers of hazardous waste from Iten Plant 1 to Iten Plant 3. This was done after my September 23, 2008 inspection and before the October 1, 2008 shipment from Iten Plant 3 to Chemical Solvents, Cleveland, Ohio. In your October 14, 2008 e-mail and during our October 16, 2008 phone conversation, you told me that Iten will no longer transport any hazardous waste between its different plants.

2. Ohio Revised Code (ORC) 3734.02(E) and (F) – Accumulation beyond 180 days.
ORC 3734.02 (E) and (F) state that no person shall establish or operate a hazardous waste facility without a permit and that no person shall store, treat, or dispose of hazardous waste except at a facility with a hazardous waste permit.

Depending on satellite accumulation exemption requirements and the generation rate during early 2008, it is likely that Iten violated ORC 3734.02(E) and (F) by storing its hazardous waste beyond 180 days (6 months). The hazardous waste that was likely illegally stored is the same waste that is mentioned above.

3. OAC rule 3745-52-20(A) – Completion of manifests.
This rule requires the completion of items 1 through 20 on the hazardous waste manifest.

Iten violated this rule by not correctly completing item 9b (shipping description) and by not completing item 13 (waste codes) on manifest 003152341 JJK (shipped on January 18, 2008). This waste was shipped with a manifest that indicated it was not a hazardous waste, however, in your e-mails of October 13 and 14, 2008 you state this manifest was for waste acetone which is a hazardous waste. **Please send me documentation that the receiving facility, Chemical Solvents, Inc., has been notified of this error.** Please also note that in signing a hazardous waste manifest, the generator is declaring that, among other things, the waste is accurately described. There are also Department of Transportation violations associated with using the wrong shipping description.
