RE: MAHONING COUNTY
INDIAN MILL CREEK BASIN
CANFIELD TOWNSHIP
BRUNO RESIDENCE

Yang Lin Qing
1305 Boardman-Canfield Road
Suite 2
Boardman, Ohio 44512

Dear Yang Lin Qing:

On May 4, 2010, Ohio EPA conducted an inspection of the Bruno Residence, located at 7368 Tippecanoe Road, Canfield Township, Mahoning County (site). Ohio EPA records indicate that the site is covered by General National Pollutant Discharge Elimination System Permit for Storm Water Associated with Construction Activity (General Storm Water Permit), permit No. 3GC04770*AG. I was accompanied by Sean McGuire and Shelly Covert of the Mahoning County Soil and Water Conservation District (Mahoning SWCD). The inspection documented the following:

- The silt fence located between the soil stockpile and Indian Mill Creek must be repaired to prevent sediment-laden storm water runoff from discharging to "waters of the state." Silt fence must be trenched six inches into the ground and properly backfilled to treat sediment-laden storm water runoff; and
- Any portion of the site that is to remain idle for twenty-one days or longer must be stabilized (i.e. seed and mulch) to prevent erosion from occurring. Many portions of the site appear to have remained idle for longer than twenty-one days and require temporary stabilization.

A written report detailing how the above deficiencies will be addressed must be submitted to Ohio EPA within seven days of receiving this letter. The above deficiencies must be addressed within fourteen days of receiving this letter. Should you have any questions regarding this matter, please contact me at your earliest convenience at (330) 963-1118.

Sincerely,

Chris Moody
