David Dreffer
Westport Development LTD
1225 Cleveland Road West
Huron, Ohio 44839

Dear Mr. Dreffer:

On July 20, 2010, Sarah Clement inspected Green Meadows Extension at the west end of Salem Drive in Huron. The purpose of the visit was to evaluate compliance of the site with the National Pollutant Discharge Elimination System (NPDES) permit for storm water discharges associated with construction activity, Facility ID No. 2 GC 02195*AG. The inspection was conducted under the provisions of Ohio's water pollution control statute, Ohio Revised Code (ORC) Chapter 6111.

At the time of the inspection, it appeared that no construction activities had begun at Green Meadows Extension. When construction begins, it is important to remember the permit requirements for storm water management during construction and post construction, such as weekly self-inspections and the requirement to apply cover on bare soil in any areas that will sit idle for more than 21 days. Your sediment controls must be installed within 7 days of grubbing and before any grading. You should refer to Ohio's *Rainwater and Land Development Manual* (ODNR) for the proper installation and maintenance of erosion and sediment control practices.

If there are any questions, please contact me at (419) 373-3009.

Sincerely,

Lynette Hablitzel, P.E.
