RE: WAYNE COUNTY  
JEFFERSON VILLAGE  
WOOSTER HYDROSTATICS  
CONSTRUCTION STORM WATER

Steve Matthew  
Campbell Construction  
1159 Blachleyville Road  
Wooster, OH 44691

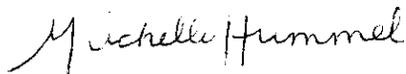

Dear Mr. Matthew:

On August 1, 2011, I performed a follow-up inspection at the above-referenced site to determine compliance with the Ohio EPA General Storm Water National Pollutant Discharge Elimination System (NPDES) Permit for Construction Activities #3GC05458\*AG. Our records indicate that Campbell Construction was granted coverage under the NPDES permit on May 18, 2011.

During my inspection, I did not note any deficiencies. Now that construction is complete on the site, please bring all areas to final grade and initiate permanent stabilization. Then, when you determine that your site has reached final stabilization and all post-construction water quality best management practices (BMPs) have been installed, you may remove all temporary sediment controls and terminate NPDES permit coverage. Final stabilization means that all soil disturbing activities at the site are complete and a uniform perennial vegetative cover (i.e., evenly distributed, without large bare areas) has reached a growth density of 70% or greater on all unpaved areas and areas not covered by permanent structures. You must submit a Notice of Termination (NOT) to Ohio EPA to terminate NPDES permit coverage within 45 days of when your site reaches final stabilization. The NOT form and instructions are available on our website at [www.epa.ohio.gov/dsw/storm/stormform.aspx](http://www.epa.ohio.gov/dsw/storm/stormform.aspx).

If you have any questions regarding this matter, please contact me at your earliest convenience at (330) 963-1128. You may also contact Dan Bogoevski of the Ohio EPA at (330) 963-1145.

Sincerely,

Michelle Hummel  
Assistant to the District Engineer  
Division of Surface Water
