Gil Mayo
VP Operations
3201 W. Old Lincoln Way
Wooster, OH 44691

Dear Mr. Mayo:

On August 14, 2012, Tony Becker and I representing Ohio EPA visited Stahl/A Scott Fetzer Co (Stahl) located at 3201 W. Lincoln Way, Wooster, Ohio to conduct a hazardous waste compliance inspection (CEI). Stahl was represented by Gina Chewning and you.

The purpose of the inspection was to determine Stahl's compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). The inspection included a review of the facility's operations, as well as written documentation. Stahl was inspected for the requirements of a small quantity generator (SQG) of hazardous waste.

Based on the inspection and e-mails received from you on August 14 and 15, 2012, Ohio EPA identified the following violations:

1. **Used Oil Storage Requirements for Generators, OAC rule 3745-279-22(C):** All containers and above ground tanks of used oil shall be clearly labeled or marked "Used Oil".

There was one drums of used oil that were not labeled with the words "used oil".

Stahl marked the drum with the words "used oil" during the inspection. Based on the August 14, 2012 inspection, this violation has been adequately addressed. No further response is requested.

2. **Waste Evaluation, OAC 3745-52-11:** Any person who generates a waste must evaluate the waste to determine if the waste is a hazardous waste in accordance with the criteria set forth in OAC Chapter 3745-51.

During the inspection you stated that the fluorescent lamps were put in the trash. We explained to you that certain lamps may be hazardous waste upon disposal due to the amount of mercury and other heavy metals present. During the inspection we gave you a copy of the June 2010 factsheet: *Ohio's Universal Waste Rules: Are you Handling Used Lamps Correctly?*

You stated during the inspection that you would start collecting lamps as they burn out and manage them as universal waste abating the violation. No further action is required.

3. **Emergency Information Posting Next to Telephone, OAC rule 3745-52-34(D)(5)(b):** The following information must be posted next to the telephone:
- a. Name and telephone number of emergency coordinator
 - b. Location of fire and spill control equipment, and, if present, fire alarms
 - c. Telephone number of local fire department

Stahl did not have all of this information posted next to the telephone.

Based on the information e-mailed to me on August 14, 2012, it appears this violation has been abated. No further action is required.

4. **The Use of On-Specification of Used Oil as a Fuel, OAC rule 3745-279-72 (A):** The first person who claims that used oil meets the specifications as set forth in the rules must be able to provide the records documenting the used oil fuel meets the specifications.

Stahl was shipping their used oil to a neighboring facility without first testing the oil to demonstrate it met specifications.

On August 14, 2012, Stahl contacted Hukill and arranged for Hukill to pick up and manage the used oil abating the violation. No further action is required.

In addition, Ohio EPA reviewed the weekly inspection records for the accumulation area that Stahl used while acting as a large quantity generator of hazardous waste. Based on a review of these records and an inspection of the area during the inspection, it appears that the **Generator Closure Requirements in OAC rule 3745-66-11** have been met.

**aUSED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:

[3745-52-34(M)]

NOTE: Waste generated at one location and transported along a publicly accessible road for temporary consolidated storage or treatment on a contiguous property also owned by the same person is not considered "on-site" and manifesting and transporter requirements must be met. To transport "along" a public right-of-way the destination facility has to act as a transfer facility or have a permit because this is considered to be "off-site." For additional information see the definition of "on-site" in OAC rule 3745-50-10.

GENERATOR LDR REQUIREMENTS

NOTE: This LDR checklist does not include the requirements for generators that treat to meet LDR standards. If the generator treats, the inspector should use the stand-alone Generator LDR checklist instead of this checklist.

GENERAL REQUIREMENTS

1.	If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07(A)(7)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
2.	Did the generator determine if the HW/soil must be treated to meet the LDR treatment standard prior to disposal? Generator knowledge or testing may be used. [3745-270-07(A)(1)] If not,	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
a.	Did the generator send the waste to a permitted HW TREATMENT facility? [3745-270-07(A)(1)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

NOTE: This is done by determining if the HW/soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07(A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

----	---	---

NOTE: This is done by evaluating which underlying hazardous constituents (UHC) are in the HW at levels above the universal treatment standards given in 3745-270-48. This requirement does not apply to high total organic carbon (i.e., contains >10% TOC) D001 wastes or listed HWs.

NOTE: Written documentation of this determination is not required.
