Hazardous Waste
Notice of Violation/Return to Compliance

February 8, 2012

Mr. Tom Jagielski, Operations Manager
Titan Tire
927 South Union Street
Bryan, Ohio 43506-2252

Dear Mr. Jagielski:

On January 25, 2012, the Ohio Environmental Protection Agency (Ohio EPA) conducted a complaint investigation and compliance evaluation inspection of Titan Tire located at 927 South Union Street in Bryan, Ohio. The Ohio EPA received a complaint that you were mislabeling waste oil/used oil and exposing workers to potentially harmful materials.

I inspected Titan Tire to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This letter will explain the validity of the complaint, the violations I found as a result of my inspection/complaint investigation, and any follow-up you need to do to correct these violations.

During my visit, I spoke with you and Dave Thomas, inspected your facility operations and reviewed applicable paperwork. Titan Tire manufactures large scale tires for farming, mining and construction equipment.

Used oil is generated as a result of the production equipment gearboxes and is stored in totes and 55-gallon drums. Used oil is picked up once a month for recycling by Cousins. The used oil is burned for energy recovery. The used oil filters are hot-drained and managed as solid waste. Titan Tire may want to consider recycling the used oil filters rather than managing them as a solid waste. A list of used oil filter recyclers was given to you at the time of my inspection/complaint investigation.

Titan Tire has a parts washer (D001) that is serviced quarterly by Crystal Clean. Titan Tire also generates spent fluorescent bulbs and batteries that are managed as universal waste. The universal waste is sent to Waste Management for recycling through their Lamp/Battery Tracker Program. At the time of my inspection/complaint investigation, Titan Tire was operating as a conditionally exempt small quantity generator (CESQG) of hazardous waste.

I found the following violations of Ohio's hazardous waste laws:

1. OAC Rule 3745-279-22(C)(1): Labeling:

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil."

Titan Tire had three 55-gallon drums of used oil that were not properly labeled.

At the time of my inspection/complaint investigation, Titan Tire properly labeled the three 55-gallon drums with the words "used oil".

Used oil generators are required to: store used oil in containers which are in good condition and which are labeled with the words "used oil"; clean up any releases of used oil; transport used oil through registered used oil transporters; and recycle or dispose of the used oil properly. A copy of the fact sheet, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, was given to you at the time of my inspection/complaint investigation. Please review this information and contact me if you have any questions.

Therefore, this violation is considered abated.

2. OAC Rule 3745-273-13(D)(1): Universal Waste: Fluorescent Lamp Management:

All lamps/bulbs being managed as a universal waste must be stored in packages that are structurally sound and adequate to prevent breakage. The packages/containers must be closed.

Titan Tire did not store the spent universal waste fluorescent lamps in containers that were closed.

At the time of my inspection/complaint investigation, Titan Tire properly closed the two boxes of spent universal waste fluorescent bulbs.

Therefore, this violation is considered abated.

3. OAC Rule 3745-273-15(C): Accumulation Time for Universal Waste Batteries and Lamps:

A small quantity handler of universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.

Titan Tire was unable to demonstrate the length of time the universal waste bulbs and universal waste batteries have been on-site. Titan Tire was able to demonstrate when the universal waste was last shipped off-site, but was not tracking the date when the accumulation began.

Mr. Tom Jagielski, Operations Manager
February 8, 2012
Page 3

At the time of my inspection/complaint investigation, Titan Tire properly labeled the two boxes of spent fluorescent bulbs and the one bucket of spent batteries with the accumulation start date.

Therefore, this violation is considered abated.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.

In regards to the complaint investigation, the Ohio EPA did not find evidence to support the complainant's allegations; therefore, the Ohio EPA considers the complaint investigation closed.

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers
