Re: Williams County
Global Suspension Systems
Industrial Storm Water

June 3, 2010

Mr. Stan Lowe
Environmental Management Representative
Global Suspension Systems
721 East Edgerton
Bryan, Ohio 43506

Dear Mr. Lowe:

On March 24, 2010, a stormwater compliance inspection was made of the Global Suspension Systems Facility in Bryan, Williams County to determine compliance with the National Pollutant Discharge Elimination System General Permit for Storm Water Associated with Industrial Activity (IGP) issued to this facility. The inspection consisted of a tour of the grounds outside of this facility and a review of the Stormwater Pollution Prevention Plan (SWP3). Global Suspension Systems manufactures metal stampings and welding mainly for the auto industry.

Scrap metal is stored under roof along with waste sludge stored in barrels, and empty containers are stored outside. Storm catch basins should be periodically cleaned of trapped sediment. A review of the SWP3 indicates that the SWP3 has been recently revised and is up to date.

The IGP was originally issued to Bryan Metal Systems LLC. If there had been a change in ownership since the IGP was issued, the permit will need to be transferred to the new owners. The form to transfer permits may be found on our website on the bottom of the following page:

<http://www.epa.ohio.gov/dsw/permits/gpfact.aspx#forms>

The IGP is set to expire on May 31, 2011. You may wish to check our website at <http://www.epa.ohio.gov/dsw/storm/index.aspx> periodically for any updates on the IGP renewal. Once the IGP is drafted and ready for public comment it will be available for viewing on our website.

Mr. Stan Lowe
