OH2201011 HURON WATER TREATMENT PLANT 41 09/24/09

Mr. Andy White, City Manager
City of Huron
417 Main Street
Huron, Ohio 44839

Subject: Disinfection Treatment (Contact Time) Treatment technique Violation

Dear Mr. White:

In violation of rule 3745-81-72(B) (1), the public water system failed to provide sufficient disinfection treatment when the actual CT was less than or equal to the required CT on one day during August 2009.

Noncompliance is a treatment technique violation that requires tier 2 public notification in accordance to rules 3745-81-32(C & E) as soon as practical, but no later than 30 days after the public water system learns of the violation. A copy of the most recent public notice for any continuing treatment technique violation must be given to all new billing units or new customers prior to or at the time service begins. An example public notice is attached.

The public water system must submit to the Ohio EPA Northwest District Office a completed verification form indicating that it has fully complied with the public notification rules within 10 days of completing the public notification requirements for the initial public notice and any repeat notices. A representative copy must be included of each type of notice distributed, published, posted, and made available to the persons served by the public water system and to the media.

If the public water system fails to correct its violations, then the director may enforce the safe drinking water rules to attain compliance. An enforcement action may include civil penalties of not more than \$25000 per day per violation in accordance with RC §§6109.33, or administrative penalties in accordance with rule 3745-81-04.

Mr. Andy White, City Manager
