RE: Notice of Violation – Monthly Report

Dear Mr. Vance:

The March 2010 Plant – Distribution Monthly Operation Report (EPA Form 5002) was received late by the Ohio EPA-Northwest District Office on April 16, 2010.

Ohio Administrative Code Rule 3745-83-01(I)(2) requires the operation report to be submitted to the district office no later than the tenth of the month following the month for which the report was prepared (i.e. May's monthly operational report should be submitted to the district office no later than June 10th). The operational report is to be signed by the operator in responsible charge designated in accordance with rule 3745-7-02 of the Administrative Code.

OAC Rule 3745-83-01(C)(1) requires a system which adds chlorine to maintain a minimum of 0.2 mg/l free chlorine residual or 1.0 mg/l combined chlorine residual measured at representative points throughout the distribution system. A review of March 2010, shows that 21 days during the month a chlorine residual was not being maintained in the distribution system. Take steps to immediately correct this problem.

OAC Rule 3745-83-01(I)(1) requires a system to report free chlorine residual and combined chlorine residual daily on the monthly operational report from the plant tap and in distribution.

Failure to take action to address this violation may result in enforcement action being taken.

If you have any questions regarding this letter, or any other matter involving your water system, please feel free to contact me at 419-373- 3089 or via e-mail to jill.schiefer@epa.state.oh.us.

Sincerely,

Jill A. Schiefer
