DRINKING WATER NOTICE

Monitoring requirements not met for MWCD-Sites Lake

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During June 1 – September 30, 2008, we "did not monitor or test" or "did not complete all monitoring or testing" for lead and copper and, therefore, cannot be sure of the quality of your drinking water during that time.

What Should I Do?

- There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.
- This notice is to inform you that MWCD-Sites lake did not monitor and report results for the presence of lead and copper in the public drinking water system during the June 1 – September 30, 2008 time period, as required by the Ohio Environmental Protection Agency.

What is being done?

The water supplier will take steps to ensure that adequate monitoring will be performed in the future.
