Republic, Ohio 44867

Re: **2007 Consumer Confidence Report**

Dear Mr. Conger:

The Ohio Environmental Protection Agency (Ohio EPA) received the 2007 Consumer Confidence Report (CCR) for the Village of Republic on June 30, 2008. The CCR was reviewed for the required content. Based on our review, the Village of Republic water system is in violation of the Ohio Administrative Code Rules 3745-96-01 through 04 for failure to comply with the CCR requirements. The following minor violations were noted:

1. The Table of Detected Contaminants contained incorrect information.

Ensure all contaminants that have an MCL have it reported in the table. There is no MCL reported for TTHM in the table.

The ranges of detection for lead and copper are incorrect (copper = 78 - 310; lead = <2.0 to 20). In addition, a comment that states that 0 of 10 samples exceeded the action level must be noted for copper and the comment for lead stating 2 of 10 samples exceeded in 2004 is incorrect. The comment for lead should state 1 of 10 samples exceeded the action level for lead in 2007.

2. Total Chlorine residual levels should be included in the table. (These levels can be found on the facility's Quarterly Total Chlorine Residual Operating Reports, Form 5114.) The Total Chlorine level was not included in the table.

Be sure to correct the violations as appropriate in your next CCR. The next report for calendar year 2008 must be sent to your customers by no later than July 1, 2009. A copy of the CCR along with a Certification Form must be submitted to the Ohio EPA, Northwest District Office at the above address. Violations in future reports may result in further enforcement action.

Mr. Rodney Conger
