Subject: 2007 CCR

Ohio EPA received the 2007 Consumer Confidence Report (CCR) for the Willshire Water Treatment Plant Public Water System on August 7, 2008. The CCR was reviewed for the required content. Based on our review, the Willshire Water Treatment Plant Public Water System is in violation of the Ohio Administrative Code (OAC) Rules 3745-96-01 through 04 for failure to comply with the CCR requirements. The following deficiencies were noted:

1. Failure to report properly the following contaminants within the Table of Detected Contaminants: Total Trihalomethanes (TTHMs), Haloacetic Acids (HAA5), Total Chlorine. Failure to report detections for Lead and Copper.
2. Failure to include definitions for: Maximum residual disinfectant level goal, Maximum residual disinfectant level,
3. Failure to report action the community water system took which demonstrates a good faith effort to reach consumers who do not receive water bills (Section 4 – Certification That The CCR Was Distributed).
4. Failure by July 1, 2008 to provide to the director a copy of the report and a distribution certification on a form acceptable to the director.

Be sure to correct the violations as appropriate in your next CCR. The next Consumer Confidence Report for calendar year 2008 must be sent to your customers by no later than July 1, 2009. A copy of the CCR along with a Certification Form must be submitted to the Northwest District Office at the above address. The CCR template and template guide are accessible on our website: [www.epa.state.oh.us/ddagw](http://www.epa.state.oh.us/ddagw).
