Nevada, Ohio 44849

SUBJECT: CCR VIOLATIONS

Dear Mr. Ames:

The Ohio EPA-Northwest District Office (NWDO) received the 2007 Consumer Confidence Report (CCR) for Village of Nevada public water system (PWS) on June 9, 2008. The CCR was reviewed for the required content. Based on our review, the Nevada PWS is in violation of the Ohio Administrative Code (OAC) rules 3745-96-01 through 04 for failure to comply with the CCR requirements, the following violations were noted:

1. The 'Table of Detected Contaminants' was included in the report. However, there was errata within the Table that was unacceptable. Specifically, the 'Level Found' values listed for Fluoride, Total Trihalomethanes (TTHMs), and Haloacetic Acids (HAA5) were incorrect. The 'Sample Year' for the HAA5 contaminant was incorrect and its units were also omitted. An example CCR 'Table of Detected Contaminants' can be found on pages 4-5 in the CCR Template Instruction Guide. [OAC rule 3745-96-02 (D)]
2. The required public educational paragraphs did not meet the requirements set forth in the regulations. The following paragraph must also be included in the mandatory educational information language section according to OAC rule 3745-96-02 (G)(1)(c).

"In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health."

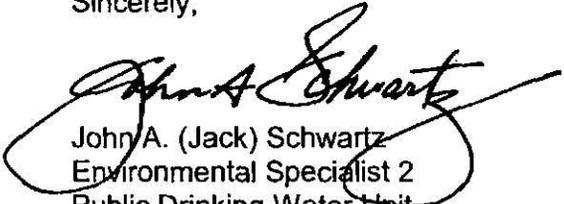

Be sure to correct the violations as appropriate in your next CCR. The next report for calendar year 2008 must be sent to your customers by no later than July 1, 2009. A copy of the CCR along with a Certification Form must also be submitted to NWDO by no later than July 1, 2009 at the above address. Violations in future reports may result in further enforcement action.

Mr. Mikah Ames
