Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. What Should I Do?

- *There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.*
- *This notice is to inform you that Clinton Lake Camping #1 did not monitor and report results for the presence of total coliform bacteria in the public drinking water system during the second quarter of 2009 time period, as required by the Ohio Environmental Protection Agency.*

What is being done?

Upon being notified of this violation, the water supply was required to have the drinking water analyzed for the above mentioned parameters. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.
