**Subject: Violation of Total Coliform Maximum Contaminant Level (MCL)
During October 2008 (Monthly)**

Pleasant Ridge Dunkard Brethren Church is in violation of the Maximum Contaminant Level (MCL) for Total Coliform established by Ohio Administrative Code (OAC), Rule 3745-81-14. Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful bacteria may be present.

ACTION REQUIRED:

- Investigate and eliminate the cause of bacterial contamination.** Special purpose samples may be collected to investigate the source of contamination or to verify elimination of the problem (these samples cannot be collected to comply with monitoring or MCL requirements; label samples as "special purpose").
- Notify the people served by this water system.** Within 30 days issue the enclosed public notice in accordance with OAC, Rule 3745-81-32 by the following method(s) to reach all persons served. The appropriate methods for your system are listed below under the **Transient Non-Community** column.

Community	Transient or Non-Transient Non-Community
<ul style="list-style-type: none"> • Mail or other direct delivery to each customer • If necessary to reach all persons regularly served, use other notification methods also, such as newspaper publication, public posting or Internet posting 	<ul style="list-style-type: none"> • Posting in conspicuous locations, such as bulletin boards, restrooms, drinking fountains, vending areas; • Mail or other direct delivery to each customer • Send to parents or guardians of children at schools or day care facilities • E-mail, newsletters or newspaper
<p>Posted notices must remain in place for as long as the violation exists, but in no case for less than seven days (even if the violation is resolved). The language in italics on the enclosed public notice is mandatory and must be included, as written. Do not make changes to the public notice without consulting with Ohio EPA beforehand.</p>

DRINKING WATER NOTICE

Tests show coliform bacteria in Pleasant Ridge Dunkard Brethren Church's water

We routinely monitor for the presence of drinking water contaminants. We took five (5) samples for coliform bacteria during October 2008. All of those samples showed the presence of coliform bacteria. No more than one (1) sample per month may show the presence of coliform bacteria during a month.

What should I do?

- *You do not need to boil your water or take other corrective actions. However, if you have specific health concerns, consult your doctor. People with severely compromised immune systems, infants, and some elderly people may be at increased risk. These people should seek advice about drinking water from their health care providers.*
- *Total coliform bacteria are generally not harmful themselves. Usually, coliforms are a sign that there could be a problem with the system's treatment or distribution system.*
- *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems. Fecal coliform or E. coli, which are bacteria of greater concern, were not detected in the water.*

What is being done?

We are still detecting coliform bacteria. We are investigating and taking the necessary steps to correct the problem as soon as possible.
