RETURN TO COMPLIANCE

Mr. Russ Brown, Vice President
MIP, Inc.
701 Jones Street
Youngstown, OH 44502

Dear Mr. Brown:

In a letter dated July 23, 2007, Ohio EPA's Division of Hazardous Waste Management (DHWM) recommended that a removal of soil and gravel be performed where hazardous and nonhazardous wastes had been accumulated. On September 7, 2007, I received a report, including photo documentation, regarding this effort. On September 27 and October 1, 2007, DHWM received the balance of information requested regarding the removal, characterization and disposal of materials from the identified areas. Based on review of the information received, it appears that all wastes that had been accumulated onsite have been properly characterized and recycled or disposed. Your response indicates that the following has been addressed: Violation #14) ORC 3734.02 (E) and (F). No further information regarding this violation is required at this time.

Based on the results of your "Subsurface Investigation" received July 15, 2007, there was one sample result that indicated possible localized elevated lead levels in the old fill area. The lead source most likely appears related to construction and demolition debris and automotive scrap recycling operations historically performed at the site. Prior to removal or generation of wastes from this area it is suggested that you contact either the Division of Hazardous Waste Management (DHWM) or the Voluntary Action Program (VAP) with the Division of Emergency Remedial Response (DERR) in regard to this matter. For corrective actions under DHWM you may contact Bill Lutz at (330) 963-1245. For the VAP, contact Rod Beals at (330) 963-1218.

No further response to this letter is required at this time. Should you have any questions you may contact me at (330) 963-1146 or at: ron.shadrach@epa.state.oh.us.

Sincerely,

Ronald J. Shadrach
Environmental Specialist
Division of Hazardous Waste Management
