Re: UPS Toledo Hub  
Lucas County  
Hazardous Waste

August 9, 2012

Mr. Michael Fall, Plant Engineering Specialist  
UPS Toledo Hub  
1550 Holland Road  
Maumee, Ohio 43537

Dear Mr. Fall:

On July 31, 2012, Robin Wiley and I conducted a compliance evaluation inspection at United Parcel Service Toledo Hub (UPS) located at 1550 Holland Road, in Maumee, Ohio. We inspected UPS to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection.

During our visit we toured your facility and reviewed applicable paperwork. UPS receives, sorts, and ships packages from the Maumee facility. The facility ships approximately 500,000 packages per day. Hazardous waste is generated when UPS encounters a damaged or leaking package. The waste generated when a spill or leak is cleaned up is lab-packed, characterized by the waste contractor, Veolia, and then placed in the appropriate satellite accumulation drum. UPS uses Klexall™ absorbent which significantly decreases the amount of waste that is generated when a spill or leak occurs. Hazardous waste is shipped off-site once every four to six weeks. The last shipment of hazardous waste occurred on June 1, 2012.

UPS services their fleet of trucks and the used oil generated is stored in two 500-gallon tanks. The used oil generated is picked up by Vesco Oil for recycling. Vesco Oil also picks up the used oil filters for recycling. One parts washer is serviced by Heritage Crystal Clean. No painting is conducted on-site and shop towels are laundered by Cintas.

Spent fluorescent lamps and rechargeable batteries are managed as universal waste. At the time of our inspection, UPS was operating as a small quantity generator of hazardous waste. We found the following violation of Ohio's hazardous waste laws:

**1. Emergency Procedures/Preparedness and Prevention, OAC Rule  
3745-52-34(D)(5)(b):**

A generator must post the following information next to the telephone: the name and telephone number of the emergency coordinator; location of fire extinguishers and spill control equipment, and if present, fire alarms; and the telephone number of the fire department, unless the facility has a direct alarm.

Mr. Michael Fall, Plant Engineering Specialist  
August 9, 2012  
Page 2

UPS failed to have the required information posted next to the telephone located in the hazardous waste storage area.

**On August 1, 2012, UPS submitted a copy of the emergency contact page that is now posted next to the telephone closest to the hazardous waste storage area. In addition, UPS submitted photographic documentation showing the emergency contact page posted next to the telephone as required.**

***Therefore, this violation has been abated.***

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.

NOTE: A generator who sends a shipment of hazardous waste to a TSD facility with the understanding that the TSD facility can accept and manage the waste and later receives that shipment back as a rejected load or residue may accumulate the waste on-site for <90 days or <180 days depending on the amount of hazardous waste on-site in that calendar month. [3745-52-34(M)]			
NOTE: Waste generated at one location and transported along a publicly accessible road for temporary consolidated storage or treatment on a contiguous property also owned by the same person is not considered "on-site" and manifesting and transporter requirements must be met. To transport "along" a public right-of-way the destination facility has to act as a transfer facility or have a permit because this is considered to be "off-site."
