**Re: Construction Storm Water Inspection at Rose Run Stream Restoration
Franklin County
Permit Numbers: 4GC03249*AG**

Dear Mr. Dorman:

This letter is written regarding a storm water inspection I conducted at Rose Run Stream Restoration located at the southwest corner of Market Street and Dublin Granville Road in New Albany, Ohio on September 28, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following issues associated with construction activities at this site:

Sediment and Erosion Controls:

- During the site investigation I evaluated the erosion protection measures to protect all areas of final grade. It appears the initial seed and mulch meets the criteria of the General Storm Water Permit. These areas must be monitored to ensure a successful vegetative cover through the winter months.
- During this phase of construction, specifically with stream restoration projects, the restored areas are highly subject to erosion concurrent with significant rain events. Please continue to conduct inspections after every rain event greater than half an inch to address any erosion which may result.

Post Construction Requirements:

- I realized that during my last inspection report I requested a demonstration of the Post Construction requirements associated with this permit. However, the linear restoration project did result in no placement of an impervious area does not require a demonstration of post construction needs.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
