**Re: Construction Storm Water Inspection at ODOT District 6, Site: MAD-40-1496
Permit Number 4GD00061*AG**

Dear Mr. Jones,

This letter is written in follow-up to a construction storm water inspection I conducted at MAD-40-1496 in West Jefferson, Ohio on June 12, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following issues associated with construction activities at this site:

Sediment and Erosion Control:

- During the inspection, I noticed the majority of the site was draining to a centralized sediment basin appropriate for the construction of this site.

Inlet Protection

- The inlet protections failed to meet the minimum criteria of the ODOT Land and Development Manual. Please implement corrective measures.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. A follow-up inspection will be conducted to ensure the conditions of the General Permit are met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
