Millersburg, OH 44654

Dear Sir/Madam:

On September 25, 2007, this office conducted an inspection of the wastewater treatment plant serving the above referenced facility. Present during the inspection were this writer and Kraig Bucklew, Holmes County Health Department.

At the time of the inspection, the treatment plant was producing what appeared to be a satisfactory quality effluent. The mixed liquor in the aeration tank had a good color. The contents of the settling tank were slightly turbid. The weirs in the clarifier need to be cleaned. The contents of the chlorine contact tank were clear, however, the tablet dechlorinator did not contain any tablets. One of the flow equalization pumps did not work. Also, one of the surface sand filter dosing pumps was inoperable. These pumps must be repaired or replaced as soon as practicable.

A review of your monthly operating reports (MORs) revealed that MORs have not been submitted by your facility from February 2006 to the present. Therefore, your facility is being referred to our legal section for an enforcement action. You will be contacted by an Ohio EPA staff attorney in the near future.

Should you have any questions or comments regarding this letter, please contact this office at (330)963-1197.

Sincerely,

Dean W. Stoll, P.E.
Environmental Engineer
Division of Surface Water
